THE REVIEW

Durham, June 3rd, 1880.

-The Montreal Annexationist Society has appointed a Committee to consider the best means of securing a return of commercial prosperity, the development of our natural resources, and the extension of our commercial relations with foreign countries. ion of this Society, the N. P. has not yet fulfilled its promises in these respects.

-The Quebec Legislature was formally opened on Thursday, by the Lieutenant-Governor. The address contained the usual congratulations of revived prosperity, &c., &c , entirely ignoring the fact, that the ancient Capital only very recently was the scene of the most disgraceful bread and la bor riots which have occurred in this coun try. The finances of Quebec seem to be in a very deplorable state, and this, together with the new loans, will no doubt prove to be the subject of lively discussion during the session.

-H. R. H. Prince Leopold is at present on a visit to Canada. From the reports of his visit to Montreal, Ottawa and Toronto it would seem that he has been much pleased with the appearance of the country, ferred for sale in this town, on the street and impressed with the warm, though in- opposite J. H. Hunter's store. See adv. formal, reception he has everywhere met ed persons who may visit this country in DR. KELLY, well and favorably known in adopted .- Carried. and to be allowed to travel in a manner this town, is here on a visit to his mother. much to the pleasure and comfort, we would past suppose, of all concerned.

man is well qualified for such a work, for with any mill in the County. he has played a most important part in the political history of Canada for the last 25 his time what Boswell has done for the life Canadians with an interesting, and no doubt, edifying picture of political life behind the scenes, but afford the future historian a mine of valuable materials. We hope, with the Mail, that he will take hold of the history of his time and find time and energy to do it.

currency policy, Sir A. T. Galt rushed to name. the British public through the columns of tion, says "that the change already made in Canadian currency is a radical one, that the security for the Canadian note issues has been distinctly impaired, and when we found the chief unofficial speaker on the Government side vindicating the alteration on the ground, that it is better that the Government should make its money, than that it should borrow abroad we are all the more inclined to deprecate the course that has been taken." The Economist is a leading financial newspaper, and the above will show "how others see us."
