THE REVIEW.

Durham, August 19th, 1880.

The Globe reviewing the effects of the National Policy on articles of domestic use, arrives at the conclusion that a small household whose annual expenditure on the necessities of life amounts to \$270 is required to pay an increased revenue tax of \$30.44. If his household expenses exceed that amount then the increased tax caused by the N. P. is proportionately greater.

The news from Ireland is not encouraging. The defeat of the Irish Compensation Bill seems to have had an irritating effect upon the peasantry, and acts of lawlessness are reported to have occurred in the south western parts of the country. Large quantities of arms have been seized and distributed and drilling is going on actively in defiance of the law. However the Government have taken every precaution for the protection of life and property.

The Grand Trunk Railway Company has floated a five per cent. loan at the high rate of 105. The money thus borrowed is to be used in paying off old debts running at 6 and 7 per cent., which arrangement the Company will effect by saving of \$75,000 a year. This successful piece of financing by the Grand Trunk shows two things—that there is a large amount of money in England seeking investment, and that the financial condition of the Grand Trunk is better now than at any previous period in its history.

The Commission recently appointed by the Dominion Government to examine into the past history and the present condition of the Pacific Railway, commenced its work on Thursday last at the city of Ottawa. The Commission consists of Judge Clark, Chairman, Messrs. Keefer, C. E., Edward Miall, and Mr. Davin, Secretary. The text of the Commission was read and stated that whereas \$14,287,920 had been expended on the Pacific Railway and that certain irregularities, extravagances and neglects are said to have occurred in connection with this expenditure; therefore, the Commission was required to enquire into the conduct and prosecution of the work, and it may be thereupon fairly inferred that the information elicited will be of a one-sided and partisan character. However, so far, the only points made are, that Mr. Mackenzie's mode of letting the telegraph contract and the contracts 14 and 15 on the Thunder Bay Branch was in the public interest.

THE "VERY WINDY MEMBER."

Under the above heading the Owen Sound Advertiser comments in its usual racy style, on a speech recently delivered by the Member of the House of Commons from East Grey—who, it appears, is familiarly known as the "very windy member." On the occasion of the visit of the Hon. Mr. Lang to Collingwood a few days ago the citizens of that town, having an axe to grind in the form of breakwaters to build and a harbour to repair, "entertained the hon. gentleman to a banquet, Reformers as well as Conservatives contributing to make it a success." The occasion and its attendant circumstances, as a matter of course, precluded any one-sided party speeches. "But," says the Advertiser, "There are some people who cannot understand even this much, and unfortunately for this county the Dominion member for East Grey has more than once demonstrated himself to be one of them. His latest outburst on good taste was at the Collingwood banquet, where he shamed his own friends and insulted his political opponents by inflicting on them what is reported to have been a red-hot Tory speech, in the shape of one of his incongruous campaign harangues slightly modified to suit the occasion."

GOOD SALE.—Mr. Joseph Whyte, of the Township of Bentick, at last Fair Day sold four head of cattle two years old for a sum of \$180. This conclusively shows the advantage of stock raising. Mr. Whyte is an enterprising farmer and gives great attention to the breed of stock as well as to present sale of all events is a reward for his labors.

HELPING A PAPER ALONG.—There are men who take an editor's paper "just to help him along." They don't care for the paper, don't read anything but city papers, but they take the home paper, just because the editor is a "pretty good sort of fellow." The trouble is that these fellows hardly ever pay for their paper, and at last the deluded editor finds that they are just helping him along towards the porch, and that he would need helping a long time before they would do him any good. Then sadly he drops them from his list, and writes "D. B." in red ink opposite their names and the amount of two or three years "helping along," after which they go about abusing him for an ungrateful fellow, and predict his speedy ruin.

BASE BALL.—The "Maple Leafs" of Durham went out to Priceville on Monday last to take the shine out of the "Stars," but they did not succeed. At the close of the game the score stood Priceville 33, Durham 23. The "Maple Leafs" believe their team can beat any team of their own weight, however.

SORROW ON EARTH.—There'll be sorrow on earth after next week for the "Stars" is going to be pulled down on the "Maple Leafs" will walk on "em an squeeze the nits lies out of 'em, an then there'll be no life but the name, poor stars! to'de mail.

tolerated him up to the present, but there is a limit beyond which the fondest indulgence cannot go, and unless every indication is fallacious, that limit, in the case of the Dominion member for East Grey, has been reached. It is now only a matter of time until the halls of Parliament shall know no more, and until he be allowed to relapse into that inconspicuous mediocrity which a combination of peculiar circumstances, fortunate for him but unfortunate for his constituents, has succeeded in raising him."

THE PACIFIC RAILWAY DEPUTATION.

It is announced that Sir John A. Macdonald and Sir Charles Tupper have left London en route for Canada, and that they will probably be accompanied by certain of the negotiating Capitalists. A similar announcement was made last year, and every body knows that the result was nil. Then as now, some elections were to be held, and the ordinary way of dealing with the public on such occasions requires, that something must be said to give the colour to the proceedings of Ministers. The Globe says that the negotiation is either a blind under cover of which the Ministers can return without acknowledging failure, or else the terms agreed upon are so injurious to Canada as to call for the condemnation of Parliament and of the people.

Local and other Items.

The Cheapest Woman's Boots are at H. W. Moeckler's.

BENNINGTON Council will meet at Allan Park on Saturday, August 28th.

CHILDREN'S BOOTS in great variety and at the lowest price at H. W. Moeckler's.

MR. J. W. ELLIOT, druggist, of Chatsworth, has been appointed Postmaster of that village.

Don't forget that Donaghy's is the place to get your children's Pictures, and now is the time to get those new Pictures and frames just to hand.

PERSONAL.—W. L. Mackenzie, teacher, of Horning's Mills, has ceased to live a life of celibacy. He joined partnership with a young lady of Walkerton, on the 14th inst., and passed through Durham on his wedding tour.

POMONA MILLS.—The Pomona Mills, Glenelg, have been thoroughly overhauled and are now placed in first-class order by the Messrs. Moorhouse, and are capable of doing as good work as any mill in the County.

We are informed that Lovell's Advanced Geography (148 pages) will be published on the 18th inst. It will contain 48 Colored Maps, 210 Illustrations, a number of Statistical Tables, and a Pronouncing Vocabulary. Price \$1.50.

LEO BROOKS.—On Friday last Mr. Thos. Wallace, of Normanby, while logging, was struck on the leg by a pole, and his ankle was crushed against a snag, breaking the outer bone. Dr. Kiernan was called in and the patient is progressing as favorably as could be expected.

The new Railway station house has received one coat of plaster. We understand that the G. W. R. Co., have put in the "diamond" at the crossing of the G.B. & W. R. at Palmerston, and that track laying on the S. & L. H. Railway has commenced at Iatowd and will be continued to Palmerston.

The Toronto Evening Telegram has been wonderfully successful since its commencement a few years ago, and now has a circulation of 10,000, and now has a copy the other day, giving a description of its handsome new office and splendid facilities which has just been put up. The Telegram is a real live city paper, and fully up to the age.

THE FAIR.—On Tuesday last the usual Monthly Fair was held, and quite a number of cattle were driven into Durham. Several very large droves were driven south during the day. The attendance of people in the Town during the day was not so large as usual, owing to the farmers being busy in the harvest just now. The usual amount of horse trading was done in the afternoon.

GOOD SALE.—Mr. Joseph Whyte, of the Township of Bentick, at last Fair Day sold four head of cattle two years old for a sum of \$180. This conclusively shows the advantage of stock raising. Mr. Whyte is an enterprising farmer and gives great attention to the breed of stock as well as to present sale of all events is a reward for his labors.

HELPING A PAPER ALONG.—There are men who take an editor's paper "just to help him along." They don't care for the paper, don't read anything but city papers, but they take the home paper, just because the editor is a "pretty good sort of fellow." The trouble is that these fellows hardly ever pay for their paper, and at last the deluded editor finds that they are just helping him along towards the porch, and that he would need helping a long time before they would do him any good. Then sadly he drops them from his list, and writes "D. B." in red ink opposite their names and the amount of two or three years "helping along," after which they go about abusing him for an ungrateful fellow, and predict his speedy ruin.

Hanover.

Last Saturday evening a little boy, son of Mr. Messenger, of the Woolen Factory, met with an accident which might have proved serious. He happened to fall from a lumber wagon on which he was riding, and one of the wheels passed over his leg, just above the knee. No bones were broken, but the little fellow was rather badly bruised, but is now up and doing well.

THE BY-LAW IN EGREMONT.

Up to the time of going to press we were unable to obtain a full statement of the vote yesterday in Egremont on the by-law offering an additional bonus of \$7,000 in aid of the G. B. & W. Railway. We learn, however, that a majority declared against the by-law at each of the five polling places, and that the total majority against it is 242. From the general feeling that has manifested itself throughout the township during the campaign a more favorable result could scarcely have been expected. After due consideration we feel assured that the electors of the township will be fully persuaded that the request of directors for additional aid, all things considered, was not an unreasonable one. The bonus previously given was a large one, certainly, but not nearly so large in comparison to the wealth of the township as other municipalities have given to provide railway facilities. It is to be regretted that rowdianism of a most pronounced type made itself conspicuous. We feel assured that a large majority of the people of the township can have no sympathy with the disgraceful conduct of a number of young men who created disturbances last week at the meetings held at Allan's school house, at the school house of the 20th concession, and at Yeovil. All of these young rowdies not only interfered with free discussion but attacked the delegates of the railway company with missiles of various kinds: At the Yeovil meeting the nut was removed from one of the wheels of a conveyance of Messrs. McMillan and Kingston, the spokes of the wheels were either altogether or partially cut through—the latter outrage not being observed till the buggy was examined next morning. Tricks like these, calculated to endanger the lives of people, are deserving of the severest condemnation, and the authorities of the Township will not do their whole duty unless they take means to discover and punish the perpetrators.—Mount Forest Examiner.

PRESENTATION.

Mr. Alexander Fraser, well known in this Town, who is employed as a lecturer on the science and art of dispensing in the Ontario School of Pharmacy in Toronto, was presented with the following address, accompanied by a heavy gold watch chain, by the students attending during the session just closed:—

A. R. Fraser, Esq., Aug. 4th, 1880.

We have taken this opportunity of intimating to you how we as a class appreciate your merits, and we can assure you, it gives us much pleasure to be able to inform you, the course you have pursued with regard to our advancement, is, and has been, very gratifying; both as to the excellent and unassuming manner in which you as our instructor, have conducted yourself, and also, as to the result of your teaching. We feel certain, that though we have had a good idea of the art of dispensing, still we have been surprised at the amount we knew little or nothing about, or even had the slightest conception of; and we know we can go forth into the world better qualified in this respect, to earn our own livelihood; owing to the efficient manner, in which, you have drilled us in the art of dispensing in all its branches, combined with its three first, and most particular features viz.—Economy, Neatness and Dispatch; and, before leaving, we hope you will accept of this slight token of our appreciation and respect, for the conscientious, and congratulatory manner, in which, you have conducted yourself throughout the course.

PRICEVILLE.

The Fair on Monday was not so well attended as usual, but there were several head of cattle offered and sold. The Auction sale of Mr. Alex Webster's was quite a success, and Mr. A. Brown will no doubt receive numerous "calls," to officiate as Auctioneer.

HORNING'S MILLS.

We are now in the midst of harvest; a deal of the grain is already at our mills. Our crops promise an abundant yield.

FATAL ACCIDENT.

A gloom has been cast over us by a painful circumstance. Mr. Marshall was at a raising, when he received a blow on the head which terminated fatally. He was a young man highly respected, and was followed to the grave by 500 persons.

LETITIA'S LIVING AGE.

The numbers of The Living Age for the weeks ending August 7th and 14th respectively, contain the following articles: The Sultan's Heir in Asia, Forthrightly; A Stranger in America; and Story-Telling, Nineteenth Century; Paasant Life in Portugal; and The Northern Shepherd, Macmillan; and A Lay Confession, Blackwood; The Harlequin and Tempering of Steel, Popular Science Review; The Austrian Power, Fraser; The Romance of Chinese Social Life, and Brantome, Temple Bar; The Decline of Hypocrisy, and the Swiss Democracy, Spectator; Artificial Diamonds, and the Caribbean Sea, Nature; "Wanted—a Groom," Graphic; with the conclusion of Mrs. Oliphant's "He that will not when he may;" A Forgotten Crime," and the usual amount of poetry. For fifty-two numbers of sixty-four large pages each (or more than 3,800 pages a year), the subscription price (\$8) is low; while for \$10.50 the publishers offer to send any one of the \$4 American monthlies or including the extra numbers of the latter, both postpaid. Lettitt & Co., Boston, are the publishers.

The North West Muddle.

We have received a communication from a well informed correspondent who left the township of Egremont last spring and who is now settled near Grand Forks, Dakota Territory, U. S. From the letter we are led to believe that the rose colored story told some time ago by Lord Bacon's friend, Sir John McDonald as authority, regarding North West immigration is hardly supported by the actual facts. Our correspondent says: "I like this country very well for a new place. It is mostly settled by Canadians. I met the census enumerator recently between the Turtle and Forest rivers, and I asked him what class of people he mostly met with. He informed me that out of five hundred names which he had on his book four hundred and seventy five of them were Canadians. This state of things exists wherever I go. A number of the people I have spoken to tell me they have been to Manitoba and left on account of the existing land regulations and the N. P."

THE NORTH WEST MUDDE.

The evidence of a respectable witness living within full view of the benefited effects of the policy at present set in force from Ottawa with regard to the North West, is worth columns of speculation and theory in the organs of the Government.—Mount Forest Examiner.

A LARGE BUSINESS.

Mr. J. T. Brill states that within the ten weeks preceding the 1st of August there were delivered at the "Tessator" creamery 1,250,000 lbs of milk and at the Walkerton creamery 6,370,000 lbs; that out of this quantity was manufactured 985 packages of butter and 60,000 lbs of cheese; and that 300 hogs were fattened on the whey, and exported. He says the amount paid out for milk in that time was \$129,900.

FIRE IN ORANGEVILLE.

—Orangeville, Aug. 15.—About 11 o'clock last night a fire was discovered in a building used by the agent of the Oshawa Hoisting and Moving Machine Company here as a storeroom at the Toronto, Grey, and Bruce Railway Station, but it was put out before any serious injury was done to the building or its contents. It broke out again, however, directly in the freight house of the railway company, about twenty-five yards distant from the storeroom. The freight house was completely destroyed, and also six box cars and one cattle car, which were standing directly in front of the freight house. The steam saw mill of the company, used by them for sawing wood, was also destroyed. There was only a small quantity of freight in at the time, but none of it was saved. The property of the railway company was partially insured. The loss is estimated at about \$5,000. The fire is supposed to be the work of an incendiary, as the floor of the storeroom where the fire was first discovered was saturated with coal oil.

GUN ACCIDENT.

—Rosseau, Aug. 13.—A gun accident occurred this morning among three boys who were camping together on an island five or six miles from Port Carling. While the Rosseau was standing in that place the captain was killed by three boys in a skiff. One of the lads, a son of Donald Guthrie, M. P., of Guelph, had accidentally been shot and wounded with a full charge of gunshot in the hip, which, on being examined presented a fearful mangled appearance. The flesh covering as much as a man's hand was all torn away, and the sight was sickening to look at. What makes the accident still sadder is the fact that it was the lad's brother who was unfortunately the cause of it. The two of them were sitting in the tent—the elder one about to remove the cartridge from a gun, while the younger one was sitting two feet distant. Some incident occurred, the shifting of a blanket or something like that, and the gun forthwith discharged. The injured boy is about ten years of age. His father had left the camp the night before and was to return to-day. He was telegraphed to await the arrival of his son at Gravenhurst. If the lad recovers it will be only through the best of medical treatment.

ACCIDENT.

—A young lad named W. Robinson, in the employ of Mr. George Fee, of Glenelg, while driving some horses belonging to a neighbor, out of a field of wheat last Tuesday, received a severe kick in the face, which split the roof of his mouth and knocked out some of his teeth. Dr. Carter of this place was called in and sewed up the cut, and it is progressing favorably.—Markdale Expressor.

THE CLASSICAL PROFESSORSHIP.

—The Globe says: We regret to learn that Mr. Warren has declined the offer of University College made to him by the Minister of Education. We are, however, happy to announce that the place has been filled through the efforts of Hon. Mr. Mowat and Dr. Daniel Wilson both of whom are now in England. Mr. Maurice Hutton, M. A., Professor of Classics in Firth College, Sheffield, Fellow of Merton College, Oxford, is the new incumbent of the chair. He obtained first class honors at the examination by Moderators, and also for his B. A. degree. The chair will undoubtedly be worthily filled, and we congratulate the Professors of University College on obtaining so distinguished a colleague.

ORANGEVILLE.

—A correspondent who paid a visit to the County Town of Dufferin, informs us that the County buildings are progressing very favorably. The most of the brick work is completed. The structure is a very handsome one, and there will be ample accommodation for all the officials. The only drawback is the height of the building, which ought at least to have been three or four feet higher than what it is. The whole affair reflects great credit on Messrs. Dobbie & Grierson, the contractors, who have spared no pains to give the Dufferin people full value for their money. Business appears to be very good in Orangeville. There are not at present more than half a dozen houses in the place vacant, and some of these are only waiting a change of tenants. The harvest in this locality is first-class, and every one seems hopeful of a prosperous future for the new county.—Guelph Mercury.

CANADIAN ITEMS.

Mr. George A. Fowler has been appointed assistant in Kincardine High School at a salary of \$500. The Fenelon Falls Gazette reports the discovery of fine marble on a farm in the township of Somerville. Milton's assessable real property this year amounts to \$274,655; personal property, \$19,974; income, \$7,700. Population, 1,358. The population of Chatham is 7,565. Its assessment is \$2,661,899, or \$120,000 lower than last year, and its rate will be about 17 mills. The barn of John Bateman, near Madoc was burned along with some hay and grain a week ago. The fire is attributed to an incendiary. The Methodist Church of the Goderich District, intend holding a camp meeting near the village of Blyth, commencing Thursday, 9th September. The man George Smith, who was thrown out of a wagon on Wednesday evening last week between Paisley and Burgoyne, died on Sunday morning last. The Stratford School board have decided to do away with the County Model School on the grounds that its existence interfered with the efficiency of the public schools. Rev. Dr. Davidson, Baptist minister of Chatham, has resigned his pastorate, owing to ill health in his family. The resignation will take effect on November the 1st. A lake steamer just down reports there are large bush fires raging on St. Joseph, Cockburn, and Manitowish Islands. Rain is wanted badly in that section to part them out. A man named Bomain was arrested at Barrie, for stealing a team of horses and buggy belonging to Robert Wilkie of West Gairfax, and has been sentenced to three years in penitentiary. The clothing store of Messrs. T. Jackson & Son, Clinton, was broken into on Saturday night, the 7th inst., and goods to the value of \$300 carried off. Entrance was made by forcing a back window. A wealthy but reckless young man named Pratt, living at St. Alban, Co., hired an old man on Thursday to pilot him down the wild rapids of the St. Alban River. Their boat was dashed to pieces on the rocks and both men were drowned. Haying is about completed in Manitoba, and the harvesting of grain has commenced. A great quantity of barley and oats is already cut. Wheat is ripening beautifully, and will be ready for the reaper on Monday next. A heavy yield is predicted everywhere. Mr. Robert Wilkes, the well-known merchant of Toronto, together with his only son, Berlie, and his daughter Florence, were drowned at Sturgeon Point, in Victoria County, on Monday. The children were bathing in Sturgeon Lake when the sad accident occurred. Rev. Principal Grant has just been made the happy recipient of a letter from Mr. George Stephen, President of the Bank of Montreal, containing a cheque of \$5,000 for Queen's College. Within the last two years he has received five subscriptions of \$5,000 each, and four of \$2,500 each. In the township of Draper, Muskoka district, a teacher punished his pupils by keeping them in after hours. One parent objected to this, came in after four o'clock, and took away his child. He was brought before the stipendiary magistrate at Bracebridge, and fined \$5 and costs for so doing. The offender was a trustee and a justice of the peace. Mr. Wm. Murlock, of Adelaide, has a complete system of water works on his farm. From an excellent well of never failing water at his house the water is elevated by means of a windmill, and by a force pump driven through pipes to reservoirs at his barns for the purpose of watering stock. The reservoirs are covered, except certain places for cattle to drink at, and his stock can get any time, winter or summer, abundance of the purest water in the yard. It is his intention to convey the water through pipes to his pasture fields, which can easily be done from the elevated position of the ground at his barns. A STRANGE CASE.—The Milton News of August 12, says: "Shortly after the death of Mrs. Walter Picher, of this town, a few months ago, Mr. Picher advertised in the Toronto Daily Mail for some respectable woman to adopt his little child, a girl of 1 year and 8 months old. In response to the advertisement a woman came to Milton, and represented herself as living in Toronto, and that she had been married for eight years, but had no children. Her husband, she said, was a clerk in Henderson's wholesale store on Front-street, and Mr. Picher, believing everything to be all right, concluded to give her the child. The necessary documents usual in such cases were written and signed by the two parties, under the direction of Rev. Mr. McKenzie, Church of England clergyman. James Harper, and that she lived at 98 Renfrew-street, Toronto. A few days afterwards a gentleman from Milton who felt interested in the matter being in the city on a visit thought he would pay a visit to the above address and see how the child was getting on. Upon enquiry, however, he found that there was no such numbered house on that street; that the highest number was 65; and that no such woman further enquiry it was learned that no such man as James Harper had ever worked for the Henderson firm. When this discovery was made, Mr. Picher's anxiety for his child's welfare became intense, and he could find out nothing whatever about either the child or the woman. Thus the matter stands, a subject of considerable interest." In the international match at Creemore between Canadian and American teams, the latter won by a few points. The match was very well contested on both sides.

THE ALGHAN REVOLT.

ALLEGED TREASON OF THE NEW ARMY. London, Aug. 14.—There is still great excitement in English military circles over General Burrow's defeat. The Indian Office has been startled by the announcement of St. Petersburg, by a well informed correspondent of the Daily News, that Abdurrahman and Yakoub Khan are acting in collusion. Considering the rivalries of the branches to which the story belongs, it is difficult to believe the story. It is alleged that such an alliance was brought about by Hussain and Pasha. Abdurrahman has also maintained communication with Kanfanan. Nevertheless, the Indian Office discredits the collusion story. London, Aug. 15.—The following is a verbatim copy of an important despatch received from a correspondent in St. Petersburg last night:—"I have grave reasons to believe that Ayoub Khan has been setting in contact with and been assisted by Abdurrahman Khan, and that the worst suspicions are not without some foundation. I would assuredly not send such discrediting intelligence except on the most serious grounds." The expression "worst suspicions" probably refers to Russian intrigues, possibly to rumors of actual co-operation with Ayoub Khan. London, Aug. 16.—A despatch from Quetta says the 13th was cut just after the details of the republic of the Afghans at Kuch were received. Although the defeat of the tribesmen appears to be complete, reinforcements have been sent, in case further attacks are made. Messages from General Phayre to Candahar have returned, as they were unable to enter the city. The siege has now commenced in earnest. Heavy and continuous fire is kept up on both sides. Ayoub Khan is attacking on two faces of the city, and a large number of men are pushing forward trenches toward the walls. Messengers deny that the Heratians have deserted Ayoub Khan. Quetta, Aug. 17.—Letters inciting the tribes to rise have been intercepted. A messenger from Candahar has brought a letter from Gen. Primrose dated the 11th. The enemy had opened fire with Armstrong guns at a distance of 2,500 yards from the city; but the damages so far are slight. In the morning a heavy musketry fire was opened at the walls from the villages on three sides of the town, but only a few of the troops were wounded. There was water for the garrison for forty five days. The exact strength of the garrison is 1,248 effective Europeans, 3,286 natives, and 882 sick. Gen. Primrose estimates Ayoub Khan's force at 10,000. DEATH FROM EXPOSURE.—The Bradford Express says:—About two weeks since a fifty year old woman and her daughter were drowned at Sturgeon Point, in Victoria County, on Monday. The children were bathing in Sturgeon Lake when the sad accident occurred. Rev. Principal Grant has just been made the happy recipient of a letter from Mr. George Stephen, President of the Bank of Montreal, containing a cheque of \$5,000 for Queen's College. Within the last two years he has received five subscriptions of \$5,000 each, and four of \$2,500 each. In the township of Draper, Muskoka district, a teacher punished his pupils by keeping them in after hours. One parent objected to this, came in after four o'clock, and took away his child. He was brought before the stipendiary magistrate at Bracebridge, and fined \$5 and costs for so doing. The offender was a trustee and a justice of the peace. Mr. Wm. Murlock, of Adelaide, has a complete system of water works on his farm. From an excellent well of never failing water at his house the water is elevated by means of a windmill, and by a force pump driven through pipes to reservoirs at his barns for the purpose of watering stock. The reservoirs are covered, except certain places for cattle to drink at, and his stock can get any time, winter or summer, abundance of the purest water in the yard. It is his intention to convey the water through pipes to his pasture fields, which can easily be done from the elevated position of the ground at his barns. A STRANGE CASE.—The Milton News of August 12, says: "Shortly after the death of Mrs. Walter Picher, of this town, a few months ago, Mr. Picher advertised in the Toronto Daily Mail for some respectable woman to adopt his little child, a girl of 1 year and 8 months old. In response to the advertisement a woman came to Milton, and represented herself as living in Toronto, and that she had been married for eight years, but had no children. Her husband, she said, was a clerk in Henderson's wholesale store on Front-street, and Mr. Picher, believing everything to be all right, concluded to give her the child. The necessary documents usual in such cases were written and signed by the two parties, under the direction of Rev. Mr. McKenzie, Church of England clergyman. James Harper, and that she lived at 98 Renfrew-street, Toronto. A few days afterwards a gentleman from Milton who felt interested in the matter being in the city on a visit thought he would pay a visit to the above address and see how the child was getting on. Upon enquiry, however, he found that there was no such numbered house on that street; that the highest number was 65; and that no such woman further enquiry it was learned that no such man as James Harper had ever worked for the Henderson firm. When this discovery was made, Mr. Picher's anxiety for his child's welfare became intense, and he could find out nothing whatever about either the child or the woman. Thus the matter stands, a subject of considerable interest." In the international match at Creemore between Canadian and American teams, the latter won by a few points. The match was very well contested on both sides.

"The English Must"

From the Guelph Mercury In the old days, after the battle of Marston, the French were accustomed to England as "perfidious Albion" for all sorts of treachery about its invasion and annihilation. This feeling, in time wore off, and the story of Britain became a very remote shadowy contingency. The sea seems to be rampant in China, it is judged by a recent article in the Globe, a faithful translation of given in the Melbourne (Australia) of June 12th, which has been translated by Mr. Robert Thompson into English. The article in many respects is original. It begins by lamenting the influx of "white barbarians" into the "have level eyes, red hair, noses, who speak the same language though belonging to rival nations, are called English and Americans." It goes on to say:—"The organs of the English are in their throats and those of Americans are in their mouths. Both together number ninety millions—if they have souls—and multiply so fast that they threaten to be numerous, before the expiration of a century, as the sands on the sea. One branch has planted itself in the south of the African continent, some islands called the West Indies, and the rest known as Canada, a large island south of Asia, from which has spread to other islands in the Ocean. Another branch has over the whole of the vast continent of North America not occupied by its elder brother, are masterful people, much to be feared, and accustomed to exterminate weaker races whom they find in the way of the land they wish to appropriate. Aboriginal tribes of North America, of America, of Australia, of New Zealand, of the islands of the Pacific, are driven away before them. Those whom they do not slay by the sword or hunt the game, they destroy by epidemics and disease. This aggressive race is so rapid that numbers of its more advanced members are constantly impelled to explore all the unknown nooks and crannies of the globe, and many of them die of the influence of this curious form of etude."

The article then goes on to mention different crimes of which the English are guilty, the chief being cruelty, knavery, infanticide, prostitution, disease, and filthy habits generally, and dignified acts which these foreigners loved to corrupt the higher Chinese civilization, which is represented as comparatively pure and refined, to that of these white barbarians. Besides their other serious objection in their insatiable machinery, and their matter in such a simple and childlike spirit that cannot refrain from giving the actual After putting it broadly that the Chinese cannot permit these barbarians to come into the country and corrupt their civilization, the article goes on to say:—"Upon our calculations the effects would be that the efforts of the English and American inventors are directed to construct machinery which shall make manual labor unnecessary. By means of a kind of coal and buckets of water put into an iron devil of power, which is a complicated piece of mechanism in motion, which do as much work in a day as a human man could do in a week. The iron devil ploughs, sows and threshes. He spins and weaves and carries. He pumps the grinds. He lifts great weights. He and his kindred; and, in short, he does that a human being is capable of doing only in a hundred times as strong an arm. Now if the foreign children should bring numbers of these iron devils to China, tens of thousands of our industrious artisans and husbandmen would be thrown out of work, and reduced to poverty in consequence. Can we contemplate such danger without alarm? Can we see this great and ancient empire to be reduced to a few miserable wretches, and a much inferior morality? Every loyal subject of His Imperial Majesty will indignantly answer "No." Therefore we adjure the Government to lose no time in commencing negotiations with the Governments of Great Britain and the United States for the abrogation of the convention signed. Tien-tsin by France, England, and on all other treaties opening our ports to the foreigners and his own to our countrymen; and pray for the issue of a decree forbidding immigration of His Imperial Majesty's subjects to other lands, from whence they bring back the evil customs and the moral degradation of the barbarians. The time has come for the whole nation to raise the cry of "The English Must!"

The above is given as a close and literal translation of those portions of the article we have copied. It will serve to show what the feeling is in regard to the English, and it will also serve to show how infatuated such protests are in the face of the fact that the much abused English have obtained such a foothold in China that no power here can bring them to bear with any effect in dislodging them. Evidently the Celestials will have to make the best of a bad bargain.

By an immense land slide at Viertport France, on Thursday, twenty persons were killed. "Castorin" is a registered trade brand, and any person selling other oils under this name will be prosecuted. Toronto Oil Co., sole manufacturers.—1120. It is officially stated that the cattle on fifteen farms in Lancashire, England, are infected with pleuro-pneumonia. Thousands of children are lost annually from cholera infantum, diarrhoea, and other stomach complaints, whose lives might be preserved by using Extract of Wild Strawberry. Physicians recommend and use it constantly. It is a sweetly flavored, and more highly valued longer known. It is for sale at all drug stores, and is within the reach of every one. The advertisement in another column.
