POETRY

To a Loved One. As summer morn in opening splendor, Wakes with sweet refreshing dew, All alone, I love to wander.

Thinking only, dear, of you. Thinking sweetly of thee, dear one, Vestured in the lobes of love, Subject of bright thoughts from dreamland. Full of light from realms above.

But alas! those days have vanished, When, with heart unknown to pride, Wrapt in innocence and g'ory. I might nestle by thy side. Still my beart shall ever cherish Loving tenderness for thee:

Tho', absorbed by thy vocations,

Thou may'st never think of me.

The Hut on the Moor.

The "Bee King"P (From the Beeton Chronicle.)

Our townsman, D. A. Jones, Esq., who is known all over the world as the "Bee King," has now the finest and most and wonder of the age. His apiaries, or bee most scientific principles—the fruit of many brought safely to this country at an enor- thirty passengers it is said were saved, but mous expense. But notwithstanding all some lives were lost; estimated from eight the time and money expended, he does not to thirty. stop here and rest contented, nor like Alex. A Deadwood miner played ball with a ander, "weep because there is no more can of nitro-glycerine just to show his comcountries to conquer," but is now engaged panions that he wasn't afraid of the stuff. in experiments, trying to breed a superior They missed him all at once, and the only race of bees to that of his Cyprus and Holy trace of his whereabouts were two cont butbees, which are acknowledged to be far a- tons and a hole in the ground. head of the natives and Italians. As soon | The statistics of failures in Great Britain as Mr. Jones arrived home from Asia with and Ireland, prepared by Mr. Richard his Cyprian and Holy queens, he commen- Seyd, of London, show that the Old ced breeding a large number of drones Country is recovering rapidly from the which he placed in hives. He then pro- depressed condition of trade, 1878 and 1879. ceeded to the Georgian Bay and selected The total number of famures in six months three islands, from five to eight miles a of this year were 6,662, against 16,635 durpart. These islands, as we stated in last ing the same period of 1879. week's issue, are many miles from shore, and are quite isolated, there being no bees nearer than fifty miles, and then only three 76,000 acres to a party of Canadians, who colonies which Mr. Jones purchased so that he might make his intentions perfect i. e. of breeding nothing but pure becs. lars; and an unlimited supply of muscle He then took his drones; Cyprian Holy and energy are lost to the Dominion, and and Italian bees and placed each on a separate island. He has skilled men on each of the islands to care for the beet, and forward all his young queens there to be fertilized, and as soon as it is accomplished they are returned to Beeton where they are introduced into strong colonies. He is also crossing a few queens of each races, in order to combine the valuable qualities

of each. There is probably no man who has suc faculties for breeding such pure races bees, and crossing the various kinds just as he wishes for experimental purposes as Mr. Jones; and he claims that the manner in which he listelies his queens gives them great superiority over the ordinary way of producing queens. For instance: he places such a large number of bees in a hive that if they had queens they would make several swarms; he then takes combs containing plenty of honey, pollen and batching brood without any eggs, and places them in; then he gets eggs from the choice queen he wishes breed from that are same mother; thus be quite prevents inlove. She had not known how, but she and in breeding. He also claims tout the over forty square miles of territory.

drones, when carefully selected, are of quite as much importance as the queens, as they exercise the greatest influence on the pregnancy. Last week, Mr. Jones showed us a letter from Mr. Frank Benton, who has charge of his apiary at Larnica, in the Island of Cyprus, which is run exclusively for queen raising, and in it he details some of the hardships and experience of conducting it there. He also mentions the heat as being very trying, 140 o in shade; yet in spite of this he is Bent-on making it a success: Weekly shipments of queens leave the Island from Canada, and will arrive in time for the Toronto Exhibition, where Mr. Jones intends making an exhibit that will be a credit to Canada and lovers of the busy bee. He has also arranged tor holding a bee keepers convention on the evenings of the 14th, 15th and 17th, thus giving those attending the convention, the one fare. The first honey ever made by Cyprian and Holy bees in America will be exhibited, which we have not the slightest doubt but will be highly commended, especially that of the Holy bees. No bee keeper should fail to attend the convention at Toronto during the Exhibition, as some very valuable information will be given regarding the new methods of securing honey and the wintering of bees without the loss of a single colony, and many other matters pertaining to bee-keeping. Hundre'ls of bee-keepers from the United States and Canada visit Beeton, but at the convention there will be an interchange of ideas that cannot fail to work much good.

Handle Dairy Stock Kindly.

Mr. Parcell, in the Report of the New cow you may expect the same, but if handthem whenever they come in his way, or if, ers; carried her down stairs; and so the way; what was it like? No; the whole He said bitterly enough that it would not when milking; a cow hoists her foot or times upset and knock you, but be kind and no good, and will do a great deal of harm."

General Longstreet, an ex-confiderate General, has been sent by President Hayes as ambassador to Turkey.

The estate of Mr. James Barber late of Georgetown, paper manufacturer, has been valued at over \$350,000. Jay Gould proposes to offer to the public his\$4,000,000 purchase, the Misseuri Pacific

road, at a capitalization of thirty million A colony of 3,000 Mennonites from the south of Russia is to settle in Delaware, where five thousand acres of land have

been bought for it. Those of the French crown jewels which are not considered of artistic value are to be sold, and the proceeds are to be expended in purchasing works of art. Their value is estimated at over a million and a quarter

A news item tells us that the Chicago and Northwestern Railway have sold over

paid therefor \$248,000. Here is one case at least where a quarter of a million of dolsecured by our neighbors across the bor-

BUTTERMILE AS SUMMER FOOD, DRINK AND MEDICINE .- A Detroit physician asserts that for a hot weather drink nothing equals buttermilk. It is, he says, 'both drink and food, and for the laborer is the best known. It supports the system, and even in fever will cure the stomach admirably. It is also a most valuable domestic remedy. It will cure dysentry as well and more quickly than any other remedy known. Dysentry is really a constipation, and is the opposite of diarrhoa. It is inflamation of the bowels with congestion of the 'portal circulation'-the circulation of blood through the bowels and liver. It is a discase always prevalent in the summer and autumn. From considerable observation l feel waranted in saying that buttermilk. drunk moderately, will cure every case of it-certainly when taken in the early

The severest hail storm witnessed in the said aloud to himself with a grim smile, as scarcely more pain to Julian than it was to colonies. As they are so strong, a large Warren County, Missouri. The stones number of queen cells are built, and fed were of various sizes, ranging from the those from ordinary colonies. He does es long, 5 inches wide, and inch thick, youth, and hope never abandons those who not breed the queens and drones from the and fail to a depth of six inches on a level,
