Nothing herein contained shall prevent took no physic." any municipal council imposing fees or regulating, as heretofore, the sale within The most humble means often will accomplish description and other articles if and so long most simple and abundant herbs are the most council on the roads of any county or conntance of -miles therefrom.

What to Teach Our Daugh-

Teach them self-reliance. Teach them to make bread. Teach them to make shirts. Teach them to foot up store bills. Teach them not to wear false hair. Teach them to wear thick, warm shoes. Bring them up in the way they should go.

Teach them how to wash and iron clothes. Teach them to cook a good meal of vic-Teach them how to make their own

Teach them that a dollar is only one hundred cents. Teach them how to darn stockings and sew on buttons.

Teach them every day dry, hard practical common sense. Teach them to say No, and mean it; or

Yes, and stick to it. Teach them to wear calico dresses, and do it like queens. Give them a good, substantial common

school education. Teach them that a good, rosy romp is worth fifty consumptives.

Teach them to regard the morals and not the money of their beaux. Teach them all the mysteries of the kitchen, the dining room, and the parlor.

Teach them that the more one lives within his income the more he will save. Teach them to have nothing to do with intemperate and dissolute young men. Teach them that a good, steady mechanic is worth a dozen loafers in broad-

Teach them that the further one lives beyond his income the nearer he gets to

the poor-house. Rely on it that upon your teaching depends in a great measure the weal or wee of their after life.

Teach them the accomplishments, music, painting, drawing, if you have time and money to do it with.

Teach them that God made them in His own image and no amount of tight lacing will improve the model. A PERVERSE ORGAN.-In a small church

at a village near Brighton, where the congregation could not afford to pay an organist, they bought a self-acting organ, a compact instrument, well suited to the purpose, and constructed to play forty different tunes. The sexton had instructions how to set it Subscribe at Once going, and how to stop it; but, unfortun ately, he forgot the latter part of his business, and, after singing the first four verses of a hymn previous to the sermon, the organ could not be stopped, and it continued playing two verses more; then, just as the clergyman completed the words "Let us pray," the organ clicked and started a fresh tune. The minister sat it out patiently and then renewed his introductory words, The Best Paper; Try It. "Let us pray," when click went the organ again, and started off another tune. The sexton and others continued their exertions to find out the spring, but no one could put a stop to it; so they got four of the stoutest men in the church to shoulder the THE SCIENTIFIC AMERICAN is a perverse instrument, and they carried it down the centre isle of the church, playing profusely illustrated with splendid engravings, re-

Minister addressed a circular to all the pre-fects, desiring them to institute enquiries fects, desiring them to institute enquiries on to the conditions which appeared to as to the conditions which appeared to Bow, New York. favor longevity in the several districts, and PATENTS. In connection with the Scithe replies are said to have almost unanimously indicated as the leading elements or influences great sobriety, regular labor or influences great sobriety, regular labor and usually in the open air, daily exercise and usually in the open air, daily exercise and residence of the Patentee By the impame and residence and the patentee By the impame and the patentee By th short of fatigue, early hours, a comparative-mense circulation thus given, public attention is mense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected. of marriage on the duration of life is universally admitted, and re-marriage does not seem to be unfavorable. The prefects also indicated heredity as a frequent cause, the influence of climate it likewise admitted; ly well-to-do life. The beneficial influence this latter, however is seperable with difficulty from other causes which may be

culty from other causes which may be operating simultaneously; but if all things were otherwise equal it would seem that work otherwise equal it would seem that southern are less favorable than longevity than northern climates.
