The Western Floods.

Quincy, Ill., Oct. 22.—Thirty-five thousand acres of land have been overflowed by a break in Warsaw and Indian Grove levees. There is imminent danger of a crevasse at East Hannibal, which would cut out several railway bridges.

The only means of communication now remaining between Quincy and the West is the Louisville branch of the Quincy Burlington & Quincy Railroad. This line is also in danger of being broken just below the city. The track is covered with from twelve to fourteen inches of water for two miles. Yesterday a train with fourteen passenger cars with two engines was sent from Hannibal to Quincy over this track. The scene as the train passed over the treacherous track was thrilling. The fire in the engine was put out, but the engine in the rear of the train pushed it through. The trains on the Quincy, Mississippi and Pacific division of the Wabash have all been discontinued. All the roads on the Missouri side will suffer severely, the water being so high that the roads will be washed out and the bridges carried away.

St. Louis, Oct. 22.—Another break occurred in the Sny levee, eleven miles below Hannibal, and it is said only about six of the sixty miles of land protected by the levee are now above water. The river below the break is now about seven miles wide, dotted here and there by farm-houses many of which are partly submerged and all deserted. The corn crop on Sny Island and the adjacent bottom is nearly all lost, and a large part of the wheat and oat crops is destroyed.

The Mississippi Flooded.—Several crevasses have taken place on the Upper Mississippi, about Quincy. A despatch on Friday says:—There are hundreds of cattle, horses, mules, and other live stock on the embankment, the owners not having time to get them to the high grounds. After the alarm given many animals were saved by swimming across the lake which now fills the low lands, but large numbers were drowned, the distance being so great that they were exhausted before reaching places of safety. The farmers, many of whom had hundreds of acres of fine winter wheat, which last week promised an immense yield, are camping along the bluffs with their families.

"Don't know half the value."
They cured me of Ague, Biliousness and Kidney Complaint, as recommended. I had half a bottle left which I used for my little girls, who the doctors and neighbors said could not be cured. I had not given them both of them one night if I had not given them Hop Bitters. They did them so much good I continued their use until they were cured. That is why I say you don't know half the value of Hop Bitters, and do not recommend them high enough. — R. Rochester, N. Y. American Rural Home.

France has no reason to feel satisfied upon the result so far of her Tunis campaign. The Arabs continue their harassing tactics, and all they report is their army ready to mutiny in consequence of the French occupation of Tunisia. The French army is in a bad plight on account of the sickness in its ranks.

Hazard's Pectoral Balsam; a few doses relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Inflammation, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to Consumption. — b190

The English admit that better flour is now made in the United States and Canada than in Great Britain. It is stated that the "new process" flour cannot be made from most of the wheat grown in that country. The best flour in Europe is manufactured in France and Hungary. That produced in England contains but a small amount of gluten.

"Hail, beautiful, bounteous, gladsome Spring!"—this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to a common Pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine. — b190

The latest Fenian device is worthy of the crazy idiots. They have made a large collection of Colorado potato bugs, with a view of sowing them in the farms of the English and Scotch settlers in Ireland. Of course the bugs, the know-nothing creatures, would not meddle with the Irishman's potatoes which happened to be alongside the English or Scotch settlers in Ireland.

That marvelous purifier, Burdock Blood Bitters, will speedily change the sallow face to one of freshness, health and beauty. It regulates the Bowels, acts promptly on the Liver and Kidneys and strengthens the system when broken down by Nervous or General Debility. Ask your Druggist for a Trial Bottle, the cost is only 10 Cents, Large Bottles \$1.00. — b190

WALKERTON FANNING MILL WORKS.

R. H. McKay, Proprietor.
Still and always to the Front.

While politicians have been discussing the question of Free Trade and Protection the ever enterprising proprietor of the Walkerton Fanning Mill Works has been busy adding improvements to his already celebrated Fanning Mill, which has fought its way through opposition and difficulties to the first rank, and now stands the

First Prize Fanning Mill of Ontario and, as in the past, is warranted to separate Corn from wheat, and any kind of Oats from Wheat, Chaff from Flour, and all kinds of Grain to perfection. For Chaffing, it has no equal. It will save Grass and Clover Seed perfectly, thus enabling Farmers to furnish their own money yearly. These improvements ought to be of the greatest importance to the farmer, more especially as all the grain he grows has to pass through the fanning mill, and as a result he will receive the highest market price, and if cleaned for seed, he grows nothing but pure grain, thus leaving good seed.

Free from Obnoxious Weeds
That contaminates and yields nothing in return. I would likewise call your attention to the latest improvements which I have made for sowing Grass seed and taking Chicks & Geese from the nest.

Which I warrant it will do perfectly, thus enabling Farmers to furnish their own Grass seed. Having obtained my Workshop and added new Machinery, I am prepared to Manufacture extensively either Wholesale or Retail.

Orders punctually attended to, and Commencement promptly answered.

R. H. McKay,
Walkerton, May 15th, 1881.
