Osprey Show.

On Tuesday, Oct. 11th the Osprey Aglage of McIntyre. The day was bright and clear, but the cold wind rendered the use of overcoats and heavy clothing a necessity as well as a comfort. It did not however prevent the farmers and their families,

The varied departments were well filled and with respect to quality the entries each were uniformally good.

The roots shown were of a good siz especially in carrots and turnips. Some good specimens of beets and other roots were also exhibited.

The exhibit of vegetables was ver fine, the pumpkins and squashes especial attracting attention, while the exhibits of potatoes also merited attention.

There was but a small display of agri cultural implements. In carriage Mesars McKenzie and McKinnon of Meaford were the chief exhibitors and showed very fine double and single buggies, and of course carried off the first prize as usual

The show of horses was superior to any try being far ahead of the county fair this respect, and would do credit to a Provincial or Dominion Exhibition. The fine art department was bardly up

to the mark although some fine specimens

The Butter exhibited was both large and several tamples were so uniformly good judging was clearly apparent. But after sche, when Burdock Blood Bitters will awarded, as many expected to Mrs. A.

as the place in which to hold the annual fair reflects preat credit on the officers and directors of the Society not only for accommodation in Mr. McLean's new hall, ample in the extreme for exhibitors to display their entries, but the manner in which things are conducted in and around the Hotel demand the approval of all visi-Notwithstanding the large attendauce none were seen during the whole day or night in a state of intoxication and the table furnished by Mrs. McLean, was anch as would reflect credit on any of our first class city hotels .- Markdale Stan-

The Varieties of Steel.

Originally, the word steel was applied only to iron which contains such quantities of carbon as would cause hardening when term cast steel applies to all the products products are too low in carbon to harden or not. The steels that are not called cast steel, German steel, shearsteal, and double shear steel. Blister steel is made by heating bars of wrought iron, bedded in charcoal, in bermetically sealed chambers. The carbon of the charcoal penetrates the hot of crude steel; large blisters rise on the surface of the bars, giving the name blister ter steel rolled down into bars. It is used grades of cast steel. Shear steel is made by taking a high heat on blister steel and hammering it thoroughly. Double shear new friend an exceedingly polished and steal is made by cutting up shear steel, very delightful man. And I do not say he The best shear steel is made out of the smothest skins.—Golden Hours. best wrought iron. The shear steels are very useful on account of their toughness and the ease with which they can be weld- Conferred upon tens of thousands of sufferers In AXES we will show this Season the most splendid assortment ever offered. New ed to any purpose for which steel is used.

Generally it is better than any other kind renewer of vitality. For purifying the blood of steel—that is to say, erucible steel made it has no equal. It tones up the system, by melting blister steel and tempered to restores and preserves the health, air suit by mixing iron of the same garde in has been in extensive use, and is to day the the crucible, is always better than German most available medicine for the suffering sick or blister steel made from the same blis. anywhere.

Bessemere steel is made by blowing air through melted cast iron, thus burning silicon and carbon out of the cast iron. After the silicon and carbon are burned out, melted spiegeleisan or ferro-magenese is added to the charge. The carbon in the spiegel re-carbonizes the steel to the desired point, and the maganese unites with and removes the oxygen which the air used leaves in the steel. Open-hearth steel is made by melting, in a very hot furnace, a charge by melting, in a very hot furnace, a charge of pig iron. To this melted iron, which is called the "bath," is added either wrought iron, scrap steel, or iron ore, and the wrought iron, scrap,or ore, reduces the carbon or silicon in the bath to such proportions as are desired in the steel. Bessen and open-hearth steel are much alike in quality. They are used mainly for rails boiler plates, ship plates, bridges and other structural purposes and machinery. The better qualities are also used largely for springs. The best spring steel like the best tool steel, is simply that which made from the best material. Quality material, chemically speaking, being equal the best spring steel is that which is madfrom crucible process is less crude that either of the others.-Ex.

bow you kept yourself and family well the past season, when all the rest of us have been sick so much, and have had the doctor "Bro. Taylor. the answer is very easy. well and saved the doctor bills. Three dollar worth of it heps no well and able to work i. the time. I'll warrant it has cost you and the neighbors one or two hundred dollars spices to keep sick the same time."
"Descoo, I'll use your medicine hereafter." MISCELLANEOUS.

caused by the recent storm in Mexico

In cases of Chronic disease which doctors have failed to onre, Burdock Blood Biterofula, Dyspepsia, Nervous Debility, Rheu-natism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating Tonic. Trial Bottles only cost 16 Cents.—d190

It is expected that a syndicate of wealthy capitalists will presently purchase the Dorchester, N. B., copper mine, paying there-

HAGYARD'S PECTORAL BALSAM is composed f the most healing balsams and gums. The were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annupreparations of the day. - b190

"I'm a very sick man," observed the tramp languidely, as he anchored himsel at a restaurant table; "the doctor says omething with plenty of iron in it." The waiter shaded the corners of his torian tones, "One keg of nails !"

HEADACHE. tles \$1.00.--b190

AGREEABLE PEOPLE.-If there be on thing more than another that makes it di fficult to get along with your fellow men it is the possession of a rough and boorish bearing. Go where you will you will always find some men who are universally shunned by their acquaintances, and if you ask the reason you generally get a reply to the effect that the men in question are so very "unmanerly." Having thus expressed my disapproval of the outward exhibition of the absence of good breeding, I shall not be so liable to be mistaken in the remarks I am going to make about sleek people. How is it, that whenever you are thrown into the company of a very polite-or over polite-person, you almost immediately distrust him. There come the redhot iron was cooled suddenly. of which you know so little, a sense of to you, acting upon the nervous part of you, This term still applies, but, in addition, the doubt. You are not averse to polite bearing and manners-nay, you like them; you Don't fail to give us a call.

of the cruicible, the Bessemer converter, even find it pleasant to receive the comand the open hearth furnace, whether such pliments so readily and glibly offered to you; to see the amiable smile; to waich the bowing head; and there is something steel are known in the market as blister in the sense of reverence and respect as expressed towards yourself very flatering to your amour propre. Yet, in spite of all, you are not sure of your companion's honesty. Yo are inclined to think there is some. 1881. thing cynical behind that smile; something iron, converting it into a crystaline mass hollow at the back of the compliment; something unreal in the look of regard. And you do not know in the least why you have steel to the product. German steel is blis- it. At the same time you find it so agreeable to be made much of, to find your opmainly for tires and common springs, but inion suddenly of value (or assumed value) is rapidly being susperseded by the cheaper in the eyes of your fellow, that you lull to rest the spirit of doubt which rises within you, and you resolve to believe your

The Parasol's Succe

The new fashions are heralded in the

city of fashion. The Vie Parisienne an sounces the advent of the paralune as a a supplement to the parasol. The rays of the moon are quite as dangerous as those of the sun, says the chroniclers of the novel. ty. One can be moon struck just as one is sun struck. It is the sun browns the skin, the moon dries it and wears it out, just as it affects the surface of stone. Therefore the ladies who are staying at houses, where long try walks at night are often arranged, that one may enjoy the moonlight, should to member to secure one of the dainty paralunes made of gauze, lined with red silk. which are declared to be the latest effort of fashion. Then, for expeditions to farm yards, etc., shoes, made of cork leather are being popularized, says the same anthority. These shoes are made on the pattern of French peasant's wooden shoes, and are worn without shppers. The Marquise must wear red silk stockings with yellow stripes when she puts her feet into these elegant parodies of an ugly article of covering. A short dress in red and yellow striped linen, a wide-brimmed hat, crowned with a bunch of wheat ears, a wide muslin fichn knotted closely over the brest, make up a picture that is a positive vision of elegant rusticity.

A carping old woman once said to her pastor, "Dear me, ministers mak' muckle adoo aboot their hard work; but what's twa bits o' sermons in the week tae mak' up? I could do't mysel'." "Weel, Janet." then," quoth she. He repeated with emphasis, "It is better to dwell in the corner of the housetop than with a brawling woman, and in a wide house." Janet fired up instantly. "What's that ye say, sir? Dae ye intend onything personal?" "Stop, stop," broke in her pastor; "you would never do for a minister." "And what for noo?" said she, "Because, Janet you come ower soon to the application."
