-An investigation is going on just nor at Owen Sound into certain irregularities which are said to have occurred in connec. Sound in 1878, 1879, 1880 and 1881, but especially at the examinations of last July A number of witnesses have been examin ed, and so far as the evidence already adduced enables an opoinion to be formed the conduct of all parties concerned has been of the most reprehensible character. It is not only that some of the candidates have been found guilty of wrong doing in manipulating their papers and getting outside assistance, but the Board of Examinere appears to have been guilty of the grossest carelessuess to use the very mildest term, and in the case of some of the higher teachers in the Owen Sound School, the evidence would show that collusion existed between themselves and the students. We hope, for the credit of the profession. the real state of things may not be as as it appears to be. At present the stingtion has an exceedingly ugly look.

As we go to press we learn that the investigation was brought to a close Tuesday evening.
