AN IMMENSE DIOCESE.—The bishop of Mooscnie, whose residence is at Moose Fac- us June 3rd. "We have sold Fowler's Exarrived in Montreal from England, after an purpose for which it is designed," Dr. Fow. England he succeeded in raising \$40,000 forms of Bowel complaints incident to Sum toward extending missions to the natives of his diocese, which is 1,200 miles long and the same number of miles broad. There do not seem to care about suppressing them. are four great tribes of Indians in the terri- Should the Chilians withdraw the reign of tory, spiritually presided over by the bishop, terror which would follow is terrible and these people have made considerable ad- contemplate. vances under the teachings of missionaries REST & COMFORT to the SUFFERING of the Church of England in civilization and Christianity. The venerable bishop has been thirty years in the Hudson Bay Territory, acting as a missionary at first and for several years lately in the higher dignity.

*Brown's Household Panacea" has no equal for relieving pain, both internal and external. It Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache, "It will most surely wonderful." "Brown's Household Panacea," being wonderful." "Brown's Household Panacea," being double the strength of any other Elixir or Liniment in the world, should be in every family handy of overseer of the work of a number of faithful missionaries under him. The difficulty of getting to his episcopal seat will be understood when it is stated that 500 miles of the latter part of the journey must be made in a canoe. The insolation from all means of communication is so great that a mail from Canada, and the outside world generally, only reaches the settlement three times a year. One ship per annum arrives at Moose Factory, from Liverpool, with supplies for the Hudson Bay Company's stations. There are six ordained missionaries laboring in the diocese, to which there will be an addition of one more, who is coming out shortly from England. Two of those now engaged are natives .- Toronto

THE POWER OF IRONCLADS. - The pluck of the British tar is proverbial, but in the recent attack on Alexandria science did the greatest execution. Science in this case could have done little without pluck, but pluck alone would have been helpless. The accounts go to show that the Inflexible and the Temeraire, at least, have been worked with as much skill and exactitude as if they had been engines of peace, instead of engines of war. The Inflexthle carried 80-ton guns, nearly 27 feet in length, i. e., as long as a rather long root and weighing as much as a heavy railway train. Her turrets are so arranged that the whole of her armament may be fired either in the line of the keel or abeam, as best suits the need. Mr. Rendel's hydraulic apparatus is used both to rotate her turrets and to fire her guns, and this machinery seems to have been used with the most perfect accuracy. Apparently it was only the Inflexible and the Temeraire, which were found up to the work Harness Shop in Durham, which the less heavily armored ships had not succeeded in silencing. The Temeraire. though inferior in force to the Inflexible, was equally well commanded and served; indeed, these two ships seem to have inflicted the most serious injury on the forts against which they fired, without receiving any

EXHIBITION OF MINERALS. - A correspon dent of the N. Y. Tribune, writes :- Four miles southwest of Denver City, Colorado, in the centre of a broad plain, stands the spacious building erected with true Western enterprise in two months and a balf, which contains the first Exposition ever held in the Rocky Mountains, and the largest as well as the most costly exhibition of minerals ever shown in this country. This Exposition shows that the feverish waves of excited immigration has subsided into a prosperous developement and permanent occupation of the land, and that mining in the Western States has well earned its rank, second only to agriculture among the National industries. For the ten years from 1870 to 1880 inclusive, according to the report of Wells, Fargo & Co., the value of the precious metals from the Western and Pacific States was \$800,000,.

OOO. Last year their yield was valued at \$83,504,417, of which Colorado, the largest producing State, furnished 26 per cent. Yet the State Geologist declares mate of the mines already discovered in some with the available mining terri
some balf of one per cent is a min continue.

Balling of one per cent is a min continue of the mines already discovered in some that "one-half of one per cent is a fair esti-

Ayer's Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

Ir is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The Vigor cleanges the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing roperties, it heals most if not all of the amoss and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and

hair are impossible. As a Dressing for Ladies' Hair The Vicor is incomparable. It is color-less, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and

unsurpassed in its excellence. Prepared by Dr. J. C. Ayer & Co., Practical and Analytical Chemists. Lowell, Mass.
