ernor of Massachusetts-both Democrats.

-A terrible culamity has happened Halifax, Nova Scotia, by the burning of the Poor Asslam on Monday night. This ty-one persons were burned to death, and there is circumstances in connection with the destruction of the building which makes it one of a most heart-rending character. The building is said to have been six stories high and the sick and feeble were pluced in the top story, thus rendering their escape impossible.

-A large portion of E. B. Eddy's lum ber Mills at Huli, opposite to Ottawa were destroyed by fire last Thursday evening. These mills are very axtensive and the loss by their destruction will be very serious both to the owner and the men working h them. Mr. Eddy has suffered terribly from fire, but has always managed to make a fresh start again. The loss by this last fire will, it is said, amount to several hundred thousand deliars.

-Intense excitement has been caused in Manitoba by the disallowance of local railway acts passed by the Manitoba Legislature, by the Dominion Government. No doubt Sir John A's Government will have to take back water on this question. The people in Manitoba are not serfs to the Canada Pacific Railway Company, and have the sympathy of the bulk of the peo- who tried it. ple of the Dominion in favor of their rights | Over fifty dozen pairs of Boots and in this matter. However, we shall soon | shees to select from at John H. Hunter & see whether Sir John or the people of Co's new Store, Durbam. Manitoba will prevail on this question.

-At the Council meeting on Monday evening last copies of the Market By-law were on the table. The by-law is to come into force on the 21st inst. We shall see the hill on Garafraxa street on the east how far the selfishness of the Lower Town Councillors will prevail in compelling farm. Mr. John Robertson is charman of the printing Committee and all printing should be given by the Town Clerk to him, day, Nov. 16 h, 1882. D. McCormick, or else to the printer direct, but A. C. Mckenzie is quite enpable in his own es timation of attending to the printing HIM SELF, so be took away the by-law and although the Chronicle office has done provjously nearly \$50 worth of printing this year and we have done less than \$20 worth for the municipality, the printing of the by-law was given to the Chronicle WITHOUT EVER CONSULTING MR. ROBERTSON IN THE MATTER AT ALL. We leave our readers to judge of the mean and contemptible man per in which the printing of the town is done and given out. And as with the di vision of the printing of the town, the treatment of the chairman of the Printing Commuttee, so has been the treatment and diwith the North Ward generally. This may be called fair dealing by A. C. Mckenzie, but others have a different opinion.

# THISTLES.

Several Conservative newspaper editors

appear to have discovered that thi tles grow on the Model Farm at Guelph! Ou. dear! dear! How mal these editors be came to think that thistles dare to grow on the Model Farm, and such a continual how has been raised ever since the discovery was made that the reading public would pituost be led to believe that such an inno cent weed as the Canadian thistle never durst lift its head above ground previous to their appearance on the Model Farm. The discovery must have happened in this way, one of these cuitors, probably a Mail one, went to see the Farm, one day in hay harvest during the summer to sec' if he could not neut up a grievance against the Mowat trovernment, and after perami-n teme without finning what he was in search of, and being rather heated by the exerci-e when in the hay field, sat down on a pice looking hay-c. ck, and-ob! murder! how quick he jumped up again all in perturbs. tou and vexation.
