Consumption as a Communicable

Disease. There are two ways in which the infection rom communicable diseases may be trans-

mitted from one animal body to another. In some diseases proximity to the person neight, and from its centre he infected is all that is required. These are 14 inches in diameter and contagious diseases. In others some medium | wide. The wheel is inclosed like food or water, is necessary for the air-tight. Along its inner of transmission of the germ. Such diseases, are ranged sixteen small pa bough communicable, are not contagious These two classes of diseases call for dif- puncture, the size of a pit erent methods of sanitary treatment. In wheel turns on an axle six is contagious affections it is obvious that since | about which is coiled the thread the infection is transmissible on a mere the wheel is suspended. Not approach to the sick person, isolation, or sixteen partitions were emp quarantining, as it is popularly called, is would be nothing to prevent t he only sure method of exterminating the about the axle uncoiling and

In the case of non-contagious communicable diseases, on the other hand, communication is not established simply by proximity | wind the alcohol on one side is his to the sick, but by intermediate means. Hence isolation is not necessary; nor is t effective, as compared with measures directed against the medium of transmis-

It is to the class of non-contagious communicable diseases that consumption belongs, in common with all disorders of a quarantine. The patient, therefore, need have no fear that he is to be isolated from his friends ; nor need we who love to render the last hours of the sufferer more endurable be alarmed lest our efforts shall only serve to spread the dread disease, if we as five a

of course not only scattered more or less the patient. The germs have a wonderful vitality, and will persist long after the sputa is dried up and invisible. It is this fact which has rendered the disease the subject of so much investigation,

What is proposed to be done in the way of remedying the evil is that consumptive persons shall be reported to the health authorities in order that the case may receive proper inspection, that the necessary disinfectants may be provided, and that the femily may be warned of the nature of the infection and the manner in It is to be hoped that efforts in this direc-
