TO MAKE PURE WATER.

Receipts for Good Home-Made Mineral Water-Drink Plenty of Water If You Would Be Realthy-It's a Good Blood Purifier and Better Than Wedleine. Buy a private still ; not a whiskey still, but a machine to make pure water for home consumption. This is the latest fad. You can purchase such a still for a few dollars, and it runs itself. All you have to do is o clean it out once in a couple of weeks. Just now epidemies of typhoid are rightening people all over the country. Its sole cause is bad water. Polinted drink is likewise accountable for malaria, the germs of which find their way from the stomach into the blood, where they feed on the red corpuscles. Public recognition of these facts has brought a rapidly increasing demand for distilled water. The household still is inexpensive. Water passes into a reservoir, in which it cannot rise above a certain limit. There t is submitted to a process of distillation that goes on all the time, the necessary heat being furnished by a single gas jet or

lamp. The contrivance is wholly automa-The body of an average man contains forty-six quarts, or ninety-six pounds, of water. He drinks every day thirty-seven ounces and eats thirty-five ounces of water. f course, foods commonly hold

A LARGE PERCENTAGE of water. The bones of this individual are nearly one-fourth water; his brain, muscles, lungs and heart are three-fourths water and his blood is more than four-fifths water. Evidently water is of sufficient importance to the human system to be worthy of serious consideration. The risk of gorn poisoning from this substance is greater than the danger from all other things taken into the body conbined. It is notoriously a fact that water has its own peculiar contamination. A stranger, not feeling well, is informed that he "has not got used to" the local drink.

the germs prevalent in that particular; vicinity. It is reckoned that two-thirds of the preventable disease of modern times arise from the use of impure water. Hospitals are maintained, cemeteries are laid out and beautified and undertakers are supported by bad water.

about a month, then he got a new leg and tasteless. This difficulty may be overcome Ships of war and merchant vessels also

nowaday are provided with apparatus for distilling sea water. The modern mariner, unless he happens to be shipwrecked, has no occasion to complain of " Water, water, magnesia. Stir it up, and there you are

about making mineral waters at home is may be dyed to suit one's fancy if preferred that they ought to be corked under pressure. In producing distilled water there is no trouble whatever, as it contains neither salts nor germs.

The manufacture of artificial mineral waters is already a great industry. This is not surprising, inasmuch as the salts are cheap and the processes easy. The formula of a natural water having been ascertained by analysis, it may be imitated readily. These imitations are commonly produced y the concerns which put up soda water, oda water goes by that name because soda used to be employed in its manufacture. Nowadays marble dust is used instead. This substance is placed in a metal tank of great strength, into which sulphuric acid drips drop by drop. Marble dust is a compound of time and carbonic acid. The action of the sulphuric acid liberates the of gas. The carbonic acid gas makes its way out of the tank and is passed through water to purify it. Finally it is forced into ten-gallon receptacles containing water. This is done under great pressure, the receptacles being continually agitated M | enable the water to take up as much of

German Emperor Was Hazed by the Dr. W. Clark Robinson of Edinburg was a classmate of Emperor William of Germany at Bonn. Telling of his first meeting with the German Emperor he said the other day It was in the fall of '78 when I first met the Emperor. He was a student at Bonn. I shall never forget the amusing spectacle he presented. You know it is the custom of the students at Bonn to take a daily plunge in the waters of the Rhine. For the new man this is a trying ordeal. When they go down to the Rhine to take their first swim they are repeatedly ducked by the older students until they cry for mercy Prince's initial appearance and when he ventured into the river he was ducked un mercifully. But William would never give up. Down again and again went the future verge of total collapse, he was pulled out of the water looking more like a drowned rat than a live man. It took us nearly twenty minutes to bring around Germany's future

Advantages of Light Railways. The question of light railways appears to be coming to the front in many parts of the world, and in this direction Belgium seems to take the lead. Turkey's Coming Man.

The coming man in Turkey is Turchan Pasha, the new Foreign Minister, who ha had a remarkable career and is in higs favor with the Sultan and the Grand Vizier. He was educated in France, and his wife is one of Turkey's rare "new women." At her husband's official receptions she stands by his side unveiled dressed in the latest European styles and wearing eyeglasses.

For Over Fifty Years.

Mrs. Winslow's Soothing Syruphas been sued by millions of mothers for their children while teething. It disturbed at night and broken of your rest by a sick child suffering and crying with pain of Cutting Teeth send at ones and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children Teething. It will relieve the poor little sufferer immedia tely. Depend upon it, mothers, there is no mistake about it. It cures Diarrhoea, reculates the Stomach and Bowels, cures Wind its laws as well as peace. - | Colic, softens the Gums and reduces Inflammation, and gives tons and energy to the whole system. "Mrs. Winslow's Soothing Wilkins—Who is that man?

Bilkins—That's Professor Littlewitt, the famous weather prophet. He makes prodictions three months ahead, and publishes them in all the daily papers.

Do they come true?

No one knows, Nobody keeps daily papers that long.
