The Grey Review.

DURHAM, OCTOBER 10, 1895.

—Sir Oliver Mowat is now in Toronto in good health. This will be a cause of rejoicing to his many friends and admirers and especially that his health has been re-established. We have it from the Mail that the object of Mowat's present visit to Toronto is to give Sir Oliver a public reception irrespective of party. This is good, and in doing so Toronto would be doing honor to itself.

—The sudden changes of the weather prevailing on both sides of the Atlantic in the fortnight rising up to twenty and again falling to the freezing point, are quite out of the ordinary run of things. Various theories have been put forth to account for these sudden changes, the most novel being that of a French astronomer who has discovered the comet Faye making directly for this planet. Its last appearance was in 1888, and as it is due to reappear in our solar system, he supposes that its proximity to the earth at the present time the sudden changes of weather we are experiencing are due.

—The Rev. Dr. Mackay, of Formosa, who has been on an extended visit to his friends in Canada, left Woodstock, the home of his boyhood, for his missionary field in Formosa on Friday last accompanied by his wife, three children and a Chinese servant. At the station many friends and relatives were assembled to see him off. From the platform of the train Dr. Mackay made a short speech concluding—"I bid you a long, long farewell. Be true, be faithful, trust in God and do the right." He expects to arrive at Tamsui, Formosa, towards the end of November.

—Having squared up matters with China, and settled the rebels in Formosa, the Japanese Government is now turning its attention to internal reforms. Among others, education comes up for consideration. The old system of studying Chinese literature in the schools is to be done away with, and a liberal system in accord with modern ideas is to be introduced. The study of the English language will be compulsory, and it is therefore not reasonably expected that within the next ten years, the teaching of the Latin and the Confucian classics will be confined to the study of antiquarians for the schools will no doubt be purely national schools.

—The latest applications of steam in the process of logging in Michigan has been in use in the Michigan lumber woods for the last two seasons, and has done splendid work in hauling logs from the lumber camps to the mills—a saving in the haulage bill being effected by one lumber man of \$250,000. In Canada there is yearly output of logs to the value of nearly \$10,000,000. The great advantage of the steam-engine to man an engine is its adaptability to a steep grade as it can do with its heavy load and climbing up to the other side at the rate of fifteen miles an hour simply guided in its movements by the pilot. The traction engine can be used for the purpose of hauling logs to the lumber woods, also for passenger traffic as well.

—A vessel supposed to be the Fram is reported to have been seen about the end of July last established in ice drift off the east coast of Greenland. The Fram sailed from Christiania, Norway over two years ago, with Dr. Nansen the Arctic explorer and his staff of assistants on board, bound for the North Pole. Dr. Nansen's intention was to get into the drift ice north of the Siberian islands and then allow his ship to be carried by the drift ice into the open sea, which is supposed to surround the North Pole—the Fram being specially constructed for such an adventure. Rumor had it that Dr. Nansen had found the North Pole and had planted Norway's flag there, but whether or not the world will rejoice at Dr. Nansen's safe return, and will be anxious to learn the particulars of his perilous voyage.

—The Armenian crisis has been transferred from Asiatic Turkey to Constantinople, where the Armenian residents, in attempting to open an interview with the Sultan on behalf of their countrymen, have been not only prevented but also the Turkish troops have been shot, not only so, but horribly massacred in cold blood. The Armenian population of Constantinople have been in consequence, infuriated and have risen in revolt against their oppressors. Dr. Nansen's expedition to the North Pole, which is supposed to surround the North Pole—the Fram being specially constructed for such an adventure. Rumor had it that Dr. Nansen had found the North Pole and had planted Norway's flag there, but whether or not the world will rejoice at Dr. Nansen's safe return, and will be anxious to learn the particulars of his perilous voyage.

—The last of Dr. Grant's letters on the Manitoba School question appears in the "Globe" in its Saturday last. It cannot be said that Dr. Grant has contributed anything towards the solution of this question. For, with the exception of this last communication, in his previous letters he assumed the position of the partizan and was loud in his praise of the Government, and in his condemnation of the act of 1890 and of those who favored a non-sectarian system of Public Schools in Manitoba. Such a course called forth bitter opposition to his views, and Mr. Joseph Martin the author of the "Globe" pointed out the mistake of facts by Dr. Grant, and his ignorance generally of the subject. In his last letter Dr. Grant puts forth a plea for compromise on the question, between the Dominion and Manitoba Governments. And in doing so, he makes a very important concession, that the Parliament of Canada has not the moral right to intrude into the Provincial domain. This was the dictum laid down by the Rev. Dr. Caven, who maintained, and rightly, that the State is an organization, and has the right at all times to legislate in accordance with the interests of the people. This School question will continue to be a disturbing question until it is settled on the lines adopted in the neighboring Republic of a purely secular basis. The State is only called upon, said Dr. Caven, to give so much education to the young as will enable them to understand the constitution under which they live. Religious training, the highest authority has declared, from the days of Moses downwards, shall belong exclusively to the parent. This is the drift of public opinion on the other side of the Atlantic where State Churchism has existed for ages.

THE TWO MR. OUMETS.

The Great Western Agricultural Exhibition was opened at Collingwood Tuesday week. The attendance was large, and the exhibition of products very creditable. The Hon. Mr. Oumet, of the Dominion Government, officiated on the occasion, and a speech of the Hon. gentleman was a remarkable one. To a foreigner not acquainted with the internal condition of affairs in the Dominion, the speech would convey the impression that the Dominion partner, the Province of Ontario, tyrannizes over its neighbors in Quebec who are of French extraction. As everybody knows, nothing could be more misleading. In the olden time, before Confederation, while Ontario paid two-thirds of the revenue, two-thirds of the expenditure was appropriated by Quebec, and since Confederation it has not been other wise. Moreover, Mr. Oumet, in his speech, is that of a gentleman who is not only a fair and just man, but also a man of high character and high ability.

—The Rev. Dr. Mackay, of Formosa, who has been on an extended visit to his friends in Canada, left Woodstock, the home of his boyhood, for his missionary field in Formosa on Friday last accompanied by his wife, three children and a Chinese servant. At the station many friends and relatives were assembled to see him off. From the platform of the train Dr. Mackay made a short speech concluding—"I bid you a long, long farewell. Be true, be faithful, trust in God and do the right." He expects to arrive at Tamsui, Formosa, towards the end of November.

TOWN COUNCIL.

Monday, Oct. 7th. Members all present Monday night. The following accounts were passed: G. Russell, Salary, \$12.20; Tremmer's Clothing, \$55.70; C. P. Kingham, work, \$2.00; Rent to A. McFarlane, \$6.25; N. G. & J. McKechnie, Lumber, \$24.00; Jno. Kinnee, building gravelled sidewalk, \$24.65; Wm. Walls, grading, \$6.00.

—The job of cutting hill, &c. had been let in the morning to Mr. A. Wilson for \$190.00 subject to approval of Council. In council a motion passed to take the report of Board of Works for further consideration at a special meeting.

—The helmets sent by the enterprising New York firm were discussed but no municipal action was or could be taken. They were simply not ordered, and remain here at the firm's cost.

—At Tuesday night's meeting the council decided to let the cutting of the hill alone this year.

—The pleasant days of October with its cool frosty nights make us believe the healthiest month of the year. The woods indicate that winter is approaching but the most time we need us to prepare for its arrival.

—Some are busy taking up their potatoes. Others think it is too early yet. The crop is good.

—Thrashing will soon be wound up and we are sorry for it is not a very pleasant work to be at on account of much dust, however, it must be done. It is very scarce and everybody seems to think they want have their own thrashing machine. However, we think when oats are up to 15c bushel that it would be a good deal to make up the deficiency in the straw.

—The Old Line Machine Company have purchased a Bell cutting thrasher from Mr. Chas. McKechnie of Durham, Duncan and Hugh McPherson are managers.

—Mr. Robert Cook a well known cattle buyer is moving to Toronto this week. We wish him success in the Queen City.

—Mr. and Mrs. Duncan Ferguson of Caledon East were visiting friends in this vicinity.

—Miss McArthur is still on the sick list but we hope soon to hear of her recovery.

—Mr. John A. Black is going to have a new house built in Durham.

—Mr. Wm. Burnett is washing business books turning the sod on the farm lately owned by Jno. Black, and we have no doubt that Bill will be a successful farmer.

—Messrs. Duncan and Sandy Muir are busy storing their corn away in their silos this week.

—Miss Bella Stewart is providing this fall with her success.

—If your child is puny, fretful, troubled with indigestion, swollen, inflamed eyes, or sores on the head, face or body, a course of Ayer's Sarsaparilla is needed to expel the scrofulous humors from the blood. The sooner you begin to give this medicine the better.

—Mr. Wm. Hall, Jr., fell through a window and down 12 feet at 10 o'clock on Monday night. He had two ribs broken, but by the skillful treatment of Dr. J. G. Marshall, he is now recovering.

—Mr. Alexander McArthur and Miss Agnes Muir were married at the residence of the bride's mother, Mrs. J. G. Marshall, on Monday night last.

—Mr. and Mrs. J. G. Marshall are expecting a child in the latter part of the month.

—Mr. James Torrie is very poorly and Mr. Torrie is suffering from a severe cold.

—Mr. Max James, the enterprising pedlar has been in the city for some time.

—Mr. J. W. Hall, of Chatham, is visiting his wife and children in this city.

—Harvest is only finished by some here on the 4th of October. They have a big crop of wheat, corn, and potatoes.

—Dr. C. McArthur and James McArthur have been in the city for some time.

—Our farmers get grain turned out well for the season of 1895.

—A CAREFUL STUDENT OF SOCIAL REFORM.

Rev. W. Galbraith, L. L. B. Pastor of Elm Street Methodist Church, Toronto.

Has a Good Word to say of Dr. Agnew's Catarrhal Powders.

The Rev. William Galbraith, L. L. B., is one of the thoughtful preachers of our day.

The active interest he has taken in questions of social reform has given him wide influence and authority.

Each, where his influence is undisputed, he has been able to speak with force and intelligence.

He is to be credited with examining into the merits of Dr. Agnew's Catarrhal Powders, with the same best of mind and heart does he say?

Dr. Agnew's Catarrhal Powders, with the same best of mind and heart does he say?
