VOL. XVII, NO. 43. DURHAM, CO. GREY, THURSDAY, OCT. 24, 1895. WHOLE NO. 893.

Result of a
Neglected Cold.
DISEASED LUNGS
Which Doctors Failed to Help,
CURED BY TAKING
AYER'S Cherry
Pectoral.

"I contracted a severe cold, which settled on my lungs, and I did not think of it until it was too late. I tried many remedies, but I found that Ayer's Cherry Pectoral was the only one that did me any good. I can now breathe freely and feel as well as ever. I feel sure that this medicine saved my life. I then purchased a bottle for my family."

Consulted a Doctor
who found, on examining my lungs, that the upper part of the left one was badly affected. I received some medicine, but it did not seem to do any good. I then consulted a doctor, who advised me to take Ayer's Cherry Pectoral. I did so, and I feel as well as ever. I feel sure that this medicine saved my life. I then purchased a bottle for my family."

WHY UNGLE SAM IS AT THEM OF INTEREST ABOUT THE BUSY YANKEE

Neighborhood interest in the Duke's Mat-
rimonial and the Queen's...
The traffic from the Lake Superior
mines this season has far to break the
record.

The only quicksilver mines of con-
sequence in this country are located in
California.

Mrs. Hearst's valuable collection of old
papers in her Washington home is insured
for \$20,000.

The Humane Society of Pittsburgh has
decided that young girls must cease sell-
ing papers on the streets.

Robert C. McCall, a Philadelphian, has
memorized the whole of the Bible and can
recite it word for word.

The Supreme Court of Ohio has declared
the State tax on inheritances by direct
heirs to be unconstitutional.

Calvin Wilson, of Jewett City, Conn.,
is now the greatest hawker in Eastern
Connecticut, owning 2,500 acres.

A fishing schooner with a freezing plant
on board to freeze the fish as fast as caught
is now plying from Gloucester.

Among the employees of the treasury
department at Washington is Mrs. Wilson,
a grandniece of President Andrew Jackson.

The Carnegie Company is reported to
have contracts on hand aggregating
nearly 1,000,000 tons of structural ma-
terial by the end of the year.

Of the 247,000 Indians in the United
States 300,000 are today engaged in
farming, stock raising and other civilized
pursuits.

It is now claimed that the Connecticut
pool law is thoroughly enforced, and that
there is not a pool-room doing business in
the State.

Charles C. Harrison has given \$500,000
to the University of Pennsylvania in honor
of his father, the late George Linn
Harrison, LL.D.

Rochester, N. Y., is considering a propo-
sition to purchase for the sum of \$300,000
Ayer's Cherry Pectoral, for use in local
clinics.

A steel in the corner of Mrs. George Cap-
linger of Clinton, New York, was found
and her husband shot at her but
once, then she died.

Gen. J. Watts De Peyster, of Tivoli,
N. Y., will contribute the money to the
building of languages for the new
Methodist University, in Washington.

A crop of sugar beets in Southern Califor-
nia this season averaged 120 tons of beets
per acre, worth \$7 per ton, or three tons of
sugar, worth \$200 when refined.

Father John Bannan, formerly known as
the fighting champion of Galt's Masquerade
Banquet, is now priest of St.
Francis Xavier's church, Dublin, Ire-
land.

William Penn Steedman, who was the
man to capture Jefferson Davis when he
was last seen in the South, is now in
one of the departments at Washington.

Instead of 5,000,000 boxes of oranges
which is Florida's usual crop, only 100,000
boxes will be shipped. This is due
chiefly from the blight which has
ravaged the State.

The National Farmers' Alliance at its
session in Raleigh, North Carolina, modi-
fied its old platform on government rail-
roads to the ownership of enough competing
lines to regulate rates.

Mountain's new code kills the oleomargarine
business by taxing that product ten
cents a pound. The State has a monopoly
of the manufacture of oleomargarine and
receives \$5,000 from the oleomargarine
tax in each year.

In the estimated value of farm prod-
ucts, according to the returns of the
United States Department of Agriculture,
New York is second with \$161,330,000;
Iowa is third with \$159,947,844.

Milton, W. Va., has a military company
composed entirely of girls. They are drill-
ing under the tutelage of a captain of the
state militia, and propose to appear in
uniform when they become of age.

It is said that there are in the State
of Kansas twenty well-built towns without
a single inhabitant, and that in this
State, no absolutely uninhabited, has
among other buildings a \$30,000 theatre.

The Right Rev. S. F. Scherer, who has
gone to China to translate the Bible
into the original tongue into the Chinese.
From the spelling of his own name it
has been suggested that he is the right man
for the job.

AGRICULTURAL.

Care of Dairy Cows in Winter.

Cows should be fed in good comfortable
stables and the arrangement of the feeding
mangers should be such that each cow can
have her food by herself so that it will not
be spoiled by the pushing of her by
another cow, writes G. F. Goodrich. In
this way the feeder can give each cow just
the quantity he wishes and he will be able
to know just how well she eats her food
and how much she eats. The practice of
throwing food of any kind out on the
ground at any time for cows to drive and
chase one another over, is always to be
condemned.

I think it best to feed three times a day,
and never feed at one time more than they
will eat. The feeder should watch his
cows, and if one leaves at the time any
kind of food is put out, he should not
feed before her, and next time feed a little
less till she finds out her capacity for eat-
ing. On the other hand, it goes awfully that
is given her quickly and from her action
seems to need more, she should next time
be fed more.

The greatest profit cows should be fed to
the full extent of their ability to consume
digest, and convert into milk the prope-
rieties of food for milk production. They
will consume more and do better if fed a
variety of foods each day. They love
the same kind of food as the human being,
and do to this human love his cows
and watch them well eating. He must
not allow any kind of food to pass them
and do the best he can for them by provid-
ing the right kind and quantity of food
for them. They love their children as well
providing food for them.

The kinds of food that cows should have
is the same as that of the human being,
and do to this human love his cows
and watch them well eating. He must
not allow any kind of food to pass them
and do the best he can for them by provid-
ing the right kind and quantity of food

THE LIME KILN CLUB.

Brother Gardner Enjoins a De- parted Member.

As soon as the secretary had finished
the report of the Lime Kiln Club, the
brother Gardner called for the report
of the Committee on Astronomy, which
should have been handed in two weeks ago.
After a few minutes' waiting, the
committee, composed of Messrs. Gardner,
Asteroid, Johnson, chairman of the com-
mittee, promptly stood up and read the
report. There had been considerable dis-
cussion in the club as to what influence on
the sun had on the weather, and the committee
had thoroughly investigated the matter.

The sun, as the committee understood it,
was manufactured and hung up in the
firmament of space by photographers,
sunrises, hay-makers and house paint-
ers, and the idea that it has any visible
effect upon weather, 35,000,000 miles away
was not to be seriously thought of. The late
remarkable summer was rather to be laid to
the supposed sliding of the North Pole
distance of over 2,000 miles south from its
normal position.

The sun, as the committee understood it,
was manufactured and hung up in the
firmament of space by photographers,
sunrises, hay-makers and house paint-
ers, and the idea that it has any visible
effect upon weather, 35,000,000 miles away
was not to be seriously thought of. The late
remarkable summer was rather to be laid to
the supposed sliding of the North Pole
distance of over 2,000 miles south from its
