

Almost a

Hopeless Case. A Terrible Cough. No Rest Night

nor Day. Given up by Doctors.

A LIFE SAVED

# BY TAKING

"Several years ago, I caught a severe cold, attended with a terrible cough that allowed me no rest, either day or night. The doctors, after working over me to the best of their ability, pronounced my case hopeless, and said they could do no more for me. A friend, learning of my trouble, sent me a bottle of Ayer's Cherry Pectoral, which I began to take, and very soon I was greatly relieved. By the time I had used the whole bottle, I was completely cured. I have never had much of a cough since that time, and I firmly believe that Aver's Cherry Pectoral saved my life."-W. H. WARD, 8 Quimby Ave., Lowell, Mass.

FACTS ABOUT THE UNCANNY BIRD THE STORMY PETREL. Some Sea Superstitions About Them-The

Nesting Habits. It is no wonder seafaring men all regard the stormy petrel as a forerunner f disaster. Not only to the queer, lowflitting, dusky birds seem to love the tempestuous weather but they come out in the greatest numbers just before ricanes. When no other bird, large or small, is in sight these weird fowl, like so many im s, sk m low ac o s the whitecaps and hover close to a ship until its superstitious crew are well-nigh frantwith dread.

Many of the older jack tars, indeed, believe that the petrels, instead of coming with the storms, actually call them up or still them at pleasure. They weave many wild yarns about "Mother Carey's chickens," and tell you how they never rest and never fly to the shore. The English Channel Islanders even contend that the eggs are held under one wing until hatched, and that emerge from the eggs. THE REAL FACTS

concerning the petrel's life and ways are full of interest even if in accepting them we must rudely shatter the fondest tralitions of the fo'castle. One reason why nothing of its nestling habits was known until about forty years ago was because t chooses only the remotest and most onely strands for its home. On the deeply indented shores of Nova Scotia nousands of them nest every year. Cape Sable and the Mud, Tusket, Shag, Gannet, Johns and Negro Islands swarm with their clumsy young in A cleft in the wave-washed rocks, a aterworn niche, the deserted burrow

of a rabbit or a woodchuck or a muskrat, any sort of a scooped place, is good enough for the petrel. It is abundan y able to dig a suitable cavity, for self, however, if no lazier way out the difficulty presents itself. Only or 14 inches deep are these hollows, judeep enough to hold Mother Petrel and relate happened about twenty years ago. her babies, and protect them from the The mother lays but a single egg dull, lustreless white, very large for It was a bright and frosty February most constantly for three weeks, while

J. Melliss. Among other things Capproduce a bloom of well-developed flowtain Melliss gives a striking instance of makes Mr. Wolcott's fairness the more gress."

While thus the writer showers praise upon us, he warns his countrymen and the Cubans that they must not expect to see all the outward benefits of Canada's autonomy in the case of the Havana as soon as that island is given self-government. Canadian prosperity, as well as Canadian autonomy and federation, are solid and stable because they are of slow growth and the result of much patient labor. He also explains that Canada, the semi-independent, is

Bad Error.

| Mamilton alone. This medicine has been used by Presbyterians like the comes from a silver State, and is himself an prosperity as with the Rev. Mungo Fraser, D.D., by Episcopalians as with the Rev. Mungo Fraser, D.D., by Episcopalians as with the Rev. W. H. Wade, and Rev. Chast. E. Whitcombe; by the well known Baptist Rev. G. Anderson; by promination and by the Rev. Father Hinchey, and by the Rev. Father Hinchey, and by the Rev. The silver men were supposed to bear the strong-advocate of silver money.
