WINTER WHEAT.

[The following article prepared by Mr. C. A. Zavitz, of the O. A. C., Guelph, is timely and will be read by our farmer readers with much interest and we hope with profit. Ed. REVIEW.]

LEADING VARIETIES THROUGHOUT ONTARIO.—Results of Co-operative Experimental Work.—Within the past 7 years, one hundred and thirty three varieties of winter wheat have been very carefully tested in the Experimental Department at the Agricultural College, Guelph. Besides ascertaining the comparative yield of grain and straw of the different varieties, the wheats have been closely examined each year for their quality of grain, time of maturity, strength of straw, freedom from rust, etc., in order to determine which kinds will give the most satisfactory results, when grown under uniform conditions. After the various varieties have been carefully tested at the College for a few years, those which have given the best satisfaction are selected for distribution throughout Ontario. This system of co-operative experimental work enables the farmers to determine for themselves which of the leading varieties will give the best results upon their own particular farms. As a practical result from obtaining information in this way, hundreds of farmers are now growing varieties in their regular farm practice, which were entirely unknown to them a short time ago. For instance, the Dawson's Golden Chaff variety of winter wheat, which has recently given such high average yields of grain per acre, both at College and throughout Ontario, was raised by farmers except in the neighborhood near Guelph, until it was sown in our Experimental Grounds in 1891, and afterwards distributed for co-operative experimental work. This is now one of the most popular varieties of winter wheat in the Province.

In the fall of 1895 nine leading varieties of winter wheat were distributed in this way. They were divided into two sets with five varieties in each. The Dawson's Golden Chaff was used in both sets to form a basis by which the results of all the varieties could be compared with one another. Each person who wanted to conduct an experiment, stated in his application which set he desired, and the five varieties in the set selected were sent to his address, with full instructions for conducting the experiment. The grain was sown at the rate of one and one-third bushels per acre, upon plots exactly uniform in size and shape. The yields per acre have been calculated from the actual results obtained from the plots.

Ninety reports of carefully conducted experiments have been received this season up to the time of writing. As these came from twenty seven of the counties in Ontario, the results should be of real practical value to the farmers of the province.

11. Reports of successful experiments with winter wheat have been received this season from 27 counties in Ontario, sixteen of which are situated east, and eleven west of the city of Guelph.

12. The principle failures in the winter wheat experiments not included in this report, were caused by winter killing, grasshoppers, accidents, etc., and in some instances by the experimenters not conducting the tests in accordance with instructions given.

13. Of the 243 experimenters who have reported the results of their tests for 1895, only three speak of wishing to discontinue the co-operative experiment at work, and much interest has been manifested throughout.

6. Dawson's Golden Chaff, Bulgarian and Pride of Genesee, were the least and, and the Surprise, Early Genesee Giant, and American Bronze were the most affected by rust.

7. Early Red Clawson and Dawson's Golden Chaff were the first to mature, and the Pride of Genesee, Early Genesee Giant and Bulgarian were the last to mature.

8. Dawson's Golden Chaff, Surprise, and Early Red Clawson produced the plumpest grain, and Jones' Winter Fife and American Bronze, the most shrunken grain.

9. Dawson's Golden Chaff was decidedly the most popular variety with the experimenters, in each of the past four years; and in 1895, it was chosen by about 50 per cent of the farmers who send in full reports, as being the best among the varieties tested.

10. Six varieties of winter wheat have been tested over Ontario for three years in succession with the following average results in bushels of grain per acre: Dawson's Golden Chaff, 31.8; Jones' Winter Fife, 29.2; Early Genesee Giant, 28.5; Early Red Clawson, 28.1; American Bronze, 27.8; Surprise, 26.8; and Bulgarian, 27.2.

The following table gives the comparative results of straw and grain per acre of the winter wheat varieties tested during the past season on 90 Ontario farms:

| Straw per acre (tons) | Grain per acre (bushels) | Dues, 40 lbs. |
|--------------------------|--------------------------|---------------|
| 1. Dawson's Golden Chaff | 1.29 | 26.4 |
| 2. Jones' Winter Fife | 1.45 | 26.4 |
| 3. Early Red Clawson | 1.27 | 24.9 |
| 4. Surprise | 1.27 | 23.8 |
| 5. American Bronze | 1.28 | 23.1 |
| 6. Early Genesee Giant | 1.20 | 21.3 |
| 7. Bulgarian | 1.39 | 20.3 |
| 8. Surprise | 1.31 | 20.3 |

14. Varieties which have given good average results in the experiments at the College for a few years, have also given good satisfaction throughout Ontario.

DISTRIBUTION OF SEED FOR TESTING PURPOSES.—In the following table will be found three sets of winter wheat varieties, which will be sent free, by mail, in half pound lots of each variety, to farmers applying for them, who will carefully test the three kinds in the set which they choose, and will report the results after harvest next year. The seed will be sent out in the order in

Nervous

Peop's had just the help they need, in Hood's Sarsaparilla. It gives the desired strength, invigorating, vitalizing and enriching blood, and thus builds up the whole system. Read this:

"I want to praise Hood's Sarsaparilla. My health run down, and I had been after that, my heart and nerves were badly affected, so that I could not do my work. Our physician gave me some help, but did not cure. I then tried Hood's Sarsaparilla. So I do all my own housework. I have

Cured

Hood's Pills with Hood's Sarsaparilla and they have done me much good. I will not be without them. I have had bottles of Hood's Sarsaparilla, and the blessing of God, it has cured me. I worked as hard as ever the past year, and I am thankful to say well. Hood's Pills have taken Hood's Sarsaparilla help very much. Mrs. M. M. MESSING, Freehold, N. J.

This and many other cures prove

Hood's Sarsaparilla

is the One True Blood Purifier. All Druggists Prepared only by C. I. Hood & Co., Lowell, Mass.

Hood's Pills act easily, promptly and effectively. 25c each.
