during recent years writes Thos. Shaw in Ohio Farmer. And it has been the periment stations and at the farms of "No, I daresay you did not," replied Sparle; "but somehow, I did not individual feeders. That wheat is He was with him one night just before the part of Rose, no change from night street in which he lived; "I want a results have been obtained from feeding wheat pound for pound as pitted against other grains, and yet th writer has never swerved one iota from the opinion that the growth of wheat as a food for live stock should be discouraged all along the line, and in sup ill, as I suppose you know. But I port of this view strong reasons may heard from a party who lived about be offered which cannot be gainsaid First, it is more costly to grow wheat pound for pound than other kinds of grain that are commonly used are. No one but a scoundred could do fering from smallpox. So, for the present, Frank Rodbury's scheme ended in so accurately divined, and by a strangmost nerve to repeat his careless laugh, 50 percent more of barley. And the boundary from the Atlantic right

> The pea crop will yield as much per acre of grain as wheat or more, and as a food for stock it is more valuable rightly saved is much more valuable more per acre than wheat under normal conditions, and it is about as valuable of this activity on the part of his light that a crop of wheat could not profitably be grown upon it.

do it; that is settled. But I am not He had long since written to Ash- thing; his companion had unconscious- for acre as the entire product of an we'll to-night; I shiver one moment, well, at an agreed adress, and direct- ly supplied him with additional reasons average hay crop, hence there should corn as a food for live stock acre for acre, corn is so far ahead of wheat. And the comparison holds true when the greater labor and consequently the greater cost of growing the corn has

Second, the comparison would be still more unfavorable for wheat if the various crops above compared were "Well, we will go in now," he began given equal chances with wheat. Wheat is usually put upon the best of the land. Soil is oftentimes specially fitted for the growth of wheat, as for in-

Of course there were an infinity of details springing out of such a scheme as this; a mean dishonorable scheme in Should be prefer to could be pre when prices are paid for wheat that named. It usually suffers more from rust, insects and smut. It is also more easily injured on the whole by adverse weather. It is, altogether, a more delicate plant, and because of this the hope of the husbandman is more frequently cut down when growing a crop of wheat than when growing the coarser grains. In fact it would seem to be true that the plants pre-eminently adapted as food to the needs of the human family should not be grown as food for live stock unless in exceptional same boat as wheat. The man who grows them primarily for live stock in a region where turnips and mangels for live stock in Ontario and Manitoba. horse wagon is sometimes used. The against growing wheat with the express strate at the same time that wheat can
