Remarkable Exhibition of Progress Shown at the Nijnt Novgorod Exposition.

Many years may elapse before Russia can become a leading manufacturing country, but her growth toward industrialism has recently been shown in a remarkable manner at the "All Rus-Inoculated Insects With Disease to Kill sian" exhibition in Nijni Novgorod. Besides her extensive sulphuric acid industry, Russia is opening up important manufactures of chromate salts, vitriol, phosphates, lead, zinc, tin strontium, and copper salts and mineral dyes, and platinum is almost a Russian monopoly. In medicinal plant growing the progress in Russia is very great. Six pastor oil factories, all working from native grown seed, were represented at the exhibition, and oils fennel, anise and pine needles were Professor Lawrence Bruner, entomo- also shown. The output of Russian benzine has grown from 31,500 gallons in 1882 to nearly 1,570,000 gallons in 1894. The petroleum industry is the second largest in the world.
