Mis Reseners Dag Through 127 Feet of Rock and the thud of to Save Him - He Tapped with His Hammer Now and Then to Let the Boys and No Food.

durance has been brought to notice in filled my throat with dust. Arizona, where a miner was entombed for thirteen days in the Mammoth mine by a cave-in, and his rescuers dug dirt had filled up the mouth of the through 127 feet of hard porphyritic drift for twenty-five feet, and I set to rocks to save his life. James Stevens, work to dig a passage to the shaft. I the miner is a man of medium size A. knew I must have air, and if I could the miner is a man of medium size. An reach the shaft my chances were good. Englishman, by birth, he has lived in It happened that the air box was not the mines of Colorado for eighteen injured, and as soon as I had cleared were of the most regular nature. It to find if I could get out in a short was due to his past life and his sturdy time, but soon the dirt began to cave constitution that he survived the orde- in around me and I had to quit. al of existing in a narrow drift under- it all out. I was penned in good and ground without food or water in dense tight, and there was nothing to do but darkness for thirteen days. Men have to wait, and, maybe, die. As soon as survived a longer fast than that he tion I began to take account of stock. discouraging conditions.

"I am feeling pretty well now," he said in an interview, "though kind of co I threw away, thinking that weak here"-rubbing his hand across it might cause me more harm than his stomach-"and. my legs are still good. I decided not to eat excepting shaky. I've quit gaining in flesh, now, severe and then only to take a small pounds of weighing what I did before the cave-in. But you should have seen make the nibbles seemed only to take a small you purchase is enclosed in a wrapping bearing the full trade mark, Dr. which resisted all treatment for three months, that was quickly cured, by four dressings of the above. I am now williams' Pink Pills for Pale People. though I still lack ten or twelve nibble of the pie or the cake. I might med grow the first days after I was "About noon on Monday my candles HOW BRITAIN'S EMPIRE GROWS. out. I could feel the flesh coming on gave out and the rest of the time I hours."

in the second level of the mine at 8 o'clock in the evening. At 10.30 o'clock the miners in camp were surprised by A TERRIFIC CRASH.

accompanied by great clouds of dust arising from the two shafts of the Mammoth mine. As the dust cleared away it was found that the entire territory embraced between the original location shaft and the subsequent the rock, and the depth they had to working shaft had caved in breaking go, and had some doubt about their down heavy timbering and permanently closing drifts, worked-out stopes, and connecting passages. As the miners in I heard sounds of rescue work. First the ship rescuing a native blown out know any one who was in the habit of than any remedy I know of; it is mild gathered about the scene some one called out, "Stevens was in No. 2," and the the third level near the main working der British protection the same day, quarries at Concord, N.H., because the na might be dangerous." examine its condition. They found that new extension from there. I took my natives were seen. the sides had caved in and filled with time it was decided to drive a shaft as when I was not sleeping, until on Wedmuch pleased at becoming British subness as possible to the mouth of the needay all sound ceased. I listened and jects. drift in which Stevens was buried. A and the work was abandoned.

to reach Stevens was by sinking a new shaft far enough away from the caverock of, a hard quality must be reached after they would die away I lay back Hebrides. All the islands are rich in ordinary times such a task would re- just as well that no other man was "A THING OF BEAUTY IS A JOY." miners thought they could do it in less us would have certainly eaten the othtime, and the work began. Relays er. aned through the solid rock. As soon hours on Wednesday I heard sounds in aned through the solid rock. As soon as depth was gained a steam hoist was rigged over the shaft to facilitate the ground and then I knew that they rigged over the shaft to facilitate the ground and then I knew that they traversing Indiana have been ordered to the debris. Every blow struck was done without loss of time, strength and decided that I might all flirtation.

I located them up in new training in one of the rainfoads to its normal condition, hearing will be detained to ease waving handkerchiefs at wo men along the line and to desist from all flirtation.

I located them up in new traversing Indiana have been ordered to caused by cutarrh, which is nothing but an inflammed condition of the mucous surfaces. We will give One Hundred Dollars for any all flirtation. to the perspiring workmen, and as soon as one set grew weary they were lifted to the surface and a fresh shift spasms occurred only once or twice a dropped down.

As day after day went by the suspense of the men working above was hard torbear. After the tenth day had passed and 100 feet had been gained, after all, I should die easy, with no by the Niagara Falls Paper Co., of the fears of the weary workers that horrible pangs of thirst or hunger. I Niagara Falls, N. Y., suffered for a Stevens might be dead or

HOPELESSLY INSANE.

made them wonder if they could make the remaining distance through the rock in time to save him. Only at long intervals did work cease for a moment to give opportunity to listen to faint knocking below, which was the only way they could know if Stevens was

But their anxiety was nothing to the suspense of the imprisoned miner. In a hesitating way Stevens told his story: When I went to work on Sunday night, the old timbers in the workedout portion of the mine were creaking at a great rate and the dirt was flying. That was nothing unusual, for it had been going on for a long time. We all knew that the cave-in must come some time, but nobody was looking for it quite so soon. Preparations had been made to fill in the stopes with dirt from the new extensions in order to They would give me no water, but make that old part safe. I was working alone in the second level extension back in the drift to wait until the sur

the drift where I was working and down I was hauled out in a bucket and Fleischmann's Yeast - One half to one cake. went back to where the drift leaves the prospect shaft. My coat and dinner pail and other things were there. As I not have it and I walked a hundred wound my watch I listened to the yards. Then I went to bed. For wound my watch I listened to the creaking of the timbers, which seemed louder than ever. It sounded pretty bad, I thought, and I wondered if I hadn't better get out. But the noises did not get any worse, and I went back to work. Once in a while I would stop the sugar, cream of tartar and yeast in the water, add the extract, and bettle; place without water, giving me only medina warm place for twenty-four hours until it ferments, then place on ice, when it will open to work. Once in a while I would stop the sugar, cream of tartar and yeast in the water, add the extract, and bettle; place in a warm place for twenty-four hours until it ferments, then place on ice, when it will open to work. Then I drank and ate a smashing dintered in the case of the sugar, cream of tartar and yeast in the water, add the extract, and bettle; place in a warm place for twenty-four hours until it ferments, then place on ice, when it will open to work. Then I drank and ate a smashing dintered in the case of the sugar, cream of tartar and yeast in the water, add the extract, and bettle; place in a warm place for twenty-four hours until it ferments, then place on ice, when it will open to without water. Then I drank and ate a smashing dintered in the water and the sugar had been dead to be a sugar cream of tartar and yeast in the water. I had to live on chicken broth for two days and still without water. The first three days I wanted a number of the sugar, cream of tartar and yeast in the water, add the extract, and bettle; place in the water and the sugar had the water and yeast in the water. I had to live on chicken broth for two days and still without water. to work. Once in a while I would stop ner. The first three days I gained fifand listen. The noises were going right along, rumbling, crashing and groaning. Finally I decided that it was a pretty bad case, and I picked up my tools and started for the shaft.

The first three days I gamed III.

I the pounds and I mended rapidly after that. The boys got up a benefit ball for me and the company paid me full wages for the time I was underground ough, is now 50 years of age, and like his brother, Lord Charles Beresford, his brother, his br ers nearest me began to snap. The noises seemed coming nearer and nearer. I paused a moment to listen again, and that pause saved my life. I knew
