Prince Ferdinand of Bulgaria is a guns, which are located automatically, and are said to fire 600 shots a min-public schools side by side.

Wine experts say that the vintage ute. These guns are very modern, and Europe this year will not rank it is claimed that they are quite effective in the field. They can be placed under cover upon a species of tripod formed of the trail and two arms, the carriage being moved off to a distance for safer keeping. The recoil simply causes the barrel, during the rapid firing, to telescope within a large barrel filled with water, so that the firing may be continuous without the barrels heating, and without changing the position of the tripod or disturbing the non-commissioned movements of the enemy. This gun consumes the .303 cordite cartridges The quick-firing Hotchkiss 6-pound-
