HE AMMUNITION FOR GUNS COULD NOT BE CARRIED.

Ten Bays' Supply Weighs 78,000 Tons, and Costs \$89,400,000- fo Transport it Would 20,000 Teamsters and a Guard of 50,000

position of the Knights of Foissart's of honor. time. They were loaded down with armor; it is hampered by its enormous ammunition trains, made necessary by the magazine rifles. The knight did not dare desert the solid ground of the high road; the army of to-day across country, for it cannot carry with it sufficient ammunition, let alone supplies. Even a superficial analymodern army as an instrument of war will prove but a clumsy tool.

In view of the numbers of men either under arms or ready at call in Europe, it is reasonable to expect that armies of 200,000 or more men each would face ment. each other should war break out between two great powers. In battle, under new conditions, not more than half of each army would be actively engaged, say 100,000 on each side-200,-000 in all. This number in a struggle lasting two days would probably be so shifted in and out of action, and lessened by death, desertion and excellent temper, and has prewounds, that the average of steady

THERTY SHOTS A MINUTE but, allowing for the clumsiness and nervousness of the soldiers, disabled guns, etc., ten shots a minute in batthat military experts look for. Thus, with 200,000 men engaged, 2,000,000 cartridges would be used every minute, at a cost of \$60,000! two days' fighting, assuming that the estimate of four hours' steady ing is correct, 480,000,000 cartridges would be used. They would weigh 12,-000 tons and cost \$14,400,000.

With each army there would be at a low estimate three hundred of the new high-power, breech-loading canbrisk artillery duel can be lired three times a minute. Assuming that artiilery will be as much used as intantry, lour hours' continuous firing would exhause 4,320,000 rounds of ammunition weigning 3,592 tons and costing \$3,-888,000. The two armies would consume in one pitched battle 15,592 tons or ammunition, costing \$17,888,000. The cost, nowever, is not the greatest prop-How are these thousands tons of cartridges to be brought to the armies and distributed to the

it is self-evident that if there is to two armies are to take their stand each on its own prontier and fire over the boundary ..ne. The invader is the war-make:, and the conditions which contront uim are the conditions of the British Association, on "Canada's Metwar. He must, of course, take his ammunition with him, but how? No General would dream of entering an enemy's country with less than ten days' pends largely on its metals, Prof. Robsupply, which would weigh 78,000 tons and cost \$89,400,000, If he can use the railroads of the in-

vader's country 780 FREIGHT CARS

would serve his purpose, but as he land industrial property fords him who can appreciate the prac-would undoubtedly find bridges blown metals he described to be gold, silver, tical lessons he is being taught in bot-up and rails twisted or carried away metals he described to be gold, silver, the same are states and the same are states and the same are same as a same are would have to use wagons. Of these, also manganese, chromium, antimony, haps other sciences. in a straight line ninety miles and require 50,000 men at least as a guard, not to mention 20,000 or so teamsters, helpers, etc. No army so hampered could be effective against an active enemy, even if it were feasible to use such a number of wagons, or possible to provide forage for the 66,000 animals

required to horse them. Magazine rifles use enormous quantities of ammunition; very well, problem, then, is how to make your enemy exhaust his while you your own supply replenished. And this brings up another problem. As 150 cartridges weigh about eight pounds, it will not be feasible for men to carry more than that number. Fifteen minutes' firing exhausts the supply. Twenty-four times during a opinion that the prospects for mining battle would the infantry need fresh in Canada are bright. By a series of ammunition, and the artillery even experiments he then showed how nickle oftener. How are they to get it? It is the old story of the knight larged on the great value of Canada's smothered in his own armor.
