Health Department.

THE COMPLEXION.

That the face with which she fronts the world never ceases to concern a woman is proved by the immense sales of complexion powders and the sublime complacency with which she will spread a rose-tinted powder upon a lemon-colored skin-with more generosity than discretion. Virginia Van de Water, writing on the subject, says:

"The first step toward clearing a poor complexion must be to have the health good. All the functions of the body must act freely and regularly, and anything like stagnation must be avoided. The liver is a powerful factor in keeping the skin in good order, and therefore this unruly member must not be permitted to become torpid or flag in its duties. Nor must its activity be produced by drugs. Gentle purgatives may be occasionally taken, but drastic medicines are to be avoided. Rather encourage the action of the liver by the free use of acid fruits, like oranges, grape fruit and apples, Graper may be eaten in abundance if the seeds are rejected. The woman who is inclined to biliousness will find lemon juice and hot water, taken at night,

an excellent corrective and consequently a skin-purifier. Pastries, fried and greasy foods and nuts must not be eaten often by one who would do her complexion justice. Plenty of rare beef, and three drops of tincture of iron aft-

BEAUTY'S BATH.

The temperature of a beautifying which rinse thoroughly. A heaping bath is ready. This renders the water teaspoonful of lime to a quart of very milky, and has a wonderfully sofwater is about the right proportion.
