

THE EVANGELICAL LUTHERAN SEMINARY OF CANADA
WATERLOO ONTARIO

April 24, 1927

Dear Mother:

I have just got back home from preaching in Toronto. I left this morning at 5:50 and got back about 6:30 to-night in time for Bonnie to go to Church, where she and the other children still are. I am baby-nurse to-night, and little Florence is so glad to see her father back home after being away all day that she wants me to hold her all of the time, which makes it rather difficult for me to get down to regular letter-writing. I got up at 4 o'clock this morning in order to get my bath, shave, eat breakfast, and fix the fires for the day before leaving on the radial. It was a cold and frosty morning, but bright and bracing as I walked to the carline this morning. But it clouded up through the day and the sun shone only intermittently, and at times we had some fierce snowsqualls making the ground white in a jiffy. We have had it cold for the last three or four days, and although I had my garden plowed on Saturday during a snow flurry, it will probably be some days before I get around to serious planting. I had a small turn-out in Toronto to-day, the congregation having probably exhausted itself by turning out in force on Palm Sunday and Easter. But I had all clear when I returned home to-night, which will help me tide over till pay-day around the first of May. Next

Sunday I am to be at Bridgeport again and am
to hold communion there on that day. I think I will
take Canabers along to play "the Litanies" for me,
as the organist regularly calls it. This week we
will begin regular work again in the Seminary.
We had only the Juniors this last week, which
made our work rather light, but now we will
have to get down to it in good earnest for a short
while again. However, I am expecting to attend
a meeting of the Senate of the University of Western
Ontario at London on Friday, and I have also finished
my work in the College School for the year except
for one examination to be held this week. Arthur
stood second in his form and was only $\frac{3}{10}$ of a point
behind the first. He would have gone way ahead
if he had not fallen so low on art. He is no drawer
and comes by that naturally both on his paternal and
maternal sides. The Board of Governors is to meet
on the 28th of this month, and I am in hopes that
they will give me some relief in a financial way
by rewarding me for the extra work I am doing in
taking up Dr. Zincke's work. I should also have
more remuneration as Bursar for the institution.
Fortunately I have had a lot of preaching to do and
have made more than \$100 since the first of Jan'y.
But I must close at this point. With love to
you all and best wishes, I am

Most sincerely yours,
Correll H. Little.
