A VERY MERRY CHRISTMAS AND A MOST HAPPY NEW YEAR

LEONARD HI-OVEN RANGE
 BAKE WITHOUT THE "AKE"

Saves Work and Worry and Fuel Too

The Ideal Two-Fuel Range (Burns Coal or Gas)—For real kitchen comfort every day in the year you need a Two-Fuel Leonard Hi-Oven Range—burns coal or gas. Your kitchen will be cool and pleasant in summer and warm and cozy in winter. The Elevated oven is a big advantage—no uncomfortable stooping. Requires small space in kitchen—only 37 inches wide. Two ranges in one and only one range to keep clean and care for. When burning coal, is a splendid heater and floor warmer.

Means Real Kitchen Comfort for YOU

The handy kindling burner saves a lot of fuss and muss. Very easy and simple to change from one fuel to the other. There are four cooking surface burners and a simmer burner. The only really simple, practical and convenient Two-Fuel Range.

Send for Free Booklet: Our interesting booklet "A Housewife's Problem" is free for the asking. It describes our complete line of eighteen different styles of Leonard Hi-Oven Ranges. Send for it.
