POTATOES TO HELP U. S.

"If we are going to win this war we must fight Germany man for man, shell for shell, potato for potato," Food Administrator Hoover said in making a plea for an increased production and consumption of potatoes in the United States.

The United States food administration is planning a consistent campaign to increase the use of Irish potatoes. Grocers will be urged to inaugurate a "potato day" each week, selecting whatever day is slack in deliveries and making a special price

Housewives will be asked to buy potatoes, a week's supply, on each potato day. The administration wishes to place the Irish potato, every day in the year, on every table in America.
