RETURN TO NORTH SHORE FROM 8500 MILE DRIVE

Tourists Tell of Experiences In Long Tour to West Coast, Through California Into Mexico and Return

Eighty-five-hundred miles by motor in a tour from the north shore through the middle west and far west and return was completed this week by Mr. and Mrs. John Bleser, Jr., of Gross Point, and Mr. and Mrs. Andrew Hostnick, 890 Willow street, Winnetka. The party returned to the north shore early this week. The tour started on July 15.

"We traveled through 13 states," says Mr. Bleser, "we negotiated 8,500 miles on 850 gallons of gasoline and 50 gallons of oil. We traveled 1000 miles in Colorado alone where we visited all places of interest including a trip up Pike's Peak. We made the summit in three and a half hours, 18 miles uphill. We traversed the Mohave desert, a distance of 471 miles, without a stop excepting to take on gasoline. We toured all around California and crossed the border into lower California. Gasoline was often as high as 60 cents a gallon.

Mr. and Mrs. Bleser visited a daughter, Mrs. William King, in Pasadena. They also visited friends and relatives in Denver.

UNCLE SAM'S BIG PAY DAY COMES ON OCT. 15

Another one of Uncle Sam's big pay days comes on October 15. Then you again will have an opportunity to clip your Liberty bond coupons and reinvest the interest in another form of Government security—War Savings stamps or the new Treasury Saving certificates. Interest on Liberty bonds to the total amount of \$78,102,249.28 will be paid by the Treasury department on October 15.

Keep your dollars working for you. That is what the wise investor does, and with the purchasing power of the dollar lower than it ever was, it is the part of wisdom to keep your income increasing until money is worth more. You can do that by reinvesting your Liberty bond investment in War Savings stamps which pay four percent interest compounded quarterly.

To save money by going without necessities is bad economy but to waste anything lessens your wealth, the wealth of your country, and the wealth of the world.

The Mysterious Black Box

Do you realize that an "Exide" Battery for your automobile which measures only 12 5-8 inches long, 7 3-8 inches wide and 9 1-8 inches high, weighs only 63 1-2 pounds, can deliver over 2,000,000 foot pounds of energy—sufficient to raise its own weight to a vertical height of over six miles?

Do you realize that in cranking an engine a 50 or 60 pound Exide Battery will develop power at the rate of over two electrical horse power?

Inch for inch and pound for pound an "Exide" Battery has more pep and power than any other battery known to science.

And it will do its work instantly, automatically and unfailingly month in and month out at temperatures ranging from below zero to 100 degrees.
