

mendations in regard to the same at a meeting of the Council of the Village of Winnetka to be held on October 21st, 1919, at eight o'clock P. M., and that the record of the minutes of this meeting be published at large in the Winnetka Weekly Talk not less than one week before any further action of this Council shall be taken upon said recommendation, estimate and ordinance, and that the said recommendation, estimate and ordinance be posted by the Village Clerk, as required by ordinance.

On motion by Trustee Wheatley, seconded by Trustee Cook, and carried, Trustees Boal, Cook, Heller, Wallace and Wheatley voting aye, the meeting adjourned.

STELLA WINSLOW,
Village Clerk.

VOTE ON GOOD ROADS BONDS IN FALL ELECTION

A plan has been endorsed by the Highway Commissioners Good Roads association to issue \$5,000,000 county good roads bonds that the improvement of roads in Cook county may be carried on until other funds are available in 1921. The bond issue will be voted upon at the election of November 4. The question of road improvement is one in which all the people of Cook county are concerned and one in which north shore people are greatly interested.

President William Busse and Secretary F. C. Dettmering have sent out the following report of the annual meeting of the association:

"The annual meeting of the Highway Commissioners Good Roads association was held in the county board rooms, Chicago, on Wednesday afternoon, September 24, at 2 o'clock.

"This association was organized for the purpose of bringing about better co-operation between highway commissioners, county, city and state officials who have to do with the construction and maintenance of hard-surfaced highways and the care of all bridges and the lateral roads of Cook county.

"William G. Edens, president of the Associated Roads organization, addressed the meeting and told of the present situation in Cook County with respect to future road building plans.

"The following resolutions were unanimously adopted in support of the \$5,000,000 Cook County bond issue:

"Whereas, under the plan adopted by Illinois to assure the immediate use of \$12,000,000 federal aid money on the highways of this state, there will be no funds available until 1921 for the continuation of a comprehensive plan of development on the roads of Cook county; and

"Whereas, the public has observed the important commercial and social benefits resulting from previous bond issues of \$3,000,000 spent on permanent good roads; therefore be it

"Resolved, by the Highway Commissioners Good Roads association, assembled in meeting on September 24, 1919, that we hereby endorse a plan for the issuance of \$5,000,000 county good roads bonds to be voted on at the election next November, the money from said bonds to carry through a construction program of approximately two years, at the end of which time the \$60,000,000 state bond issue will be available to continue the work.

"It was ordered upon motion that a copy of these resolutions be sent to all members of the county board, township highway commissioners, village presidents and clerks, and to all of the newspapers published in Cook county. It is respectfully urged that all of these parties should bring this matter to the attention of the voters between now and election on November 4, so that the issue may be fully understood."

DISTILLED WATER IS ESSENTIAL FOR USE IN BATTERIES

Putting ordinary water in a battery is a good deal like putting dirty ice in a refrigerator. Once or twice may do no harm, but the trouble piles up, and everything happens at once.

"When a storage battery is built," says Mr. Carpenter, north shore representative of the Willard Storage Battery company, "it has in it all the elements necessary to insure satisfactory operation. Nothing can get out of it except the water that evaporates, and nothing can get into it unless it is contained in some form in the water that you add.

"If distilled water only is added week or so to make up for the amount that evaporates contains ever so little iron in any form or other substance, this will remain in the battery. A little more is put in each time, and soon there is enough to interfere with proper action, and your battery wears out much more rapidly than it should.

"If distilled water only is added there is no chance of foreign substances working their way in, and consequently the battery plates will give better and longer service."

Thrifty is steady earning, wise spending, sane saving, careful investing, and the avoidance of all waste.

American Legion Prepares to Lend Support to \$750,000 Roosevelt Memorial Campaign

All over the state of Illinois the American Legion is preparing to give whole-hearted support to the Roosevelt Memorial Association's campaign for \$750,000 with which to erect monuments, parks and endowments in honor of the great ex-President. Without exception the returned soldiers and sailors revere the memory of the hero of San Juan hill and the one American who first saw and preached the need of national preparedness. When the drive starts October 20, the military men will be on hand recounting the Colonel's personal bravery, his Spartan fortitude in sending his four sons to the war and his firmness in the fact of the disaster which befell him when his son Quentin was killed in his airplane, and his sons Theodore, Jr., and Archie were wounded in France.

With the addition of the American Legion to those bodies that will assist in the non-partisan, non-class, none-sectarian campaign, organization nears completion in Illinois. Some county chairmen are yet to be chosen but the congressional district chairmen's reports daily show splendid progress toward completion of the organization of their counties. In farming communities particularly the

drive will be quickly over, it is freely predicted at the association's headquarters, for "Teddy's" popularity with all men who live in the open was proverbial, and his nearness to the staunch Americanism of the Middle western farmer was always a noteworthy thing.

Outside Chicago the state's quota is \$3,000,000 and it is known that the emphasis of the campaign will not be spent so much on the speed with which this is raised as on the accumulation of great numbers of signers, the size of the membership be-

ing of more importance than the size of the contribution, since the principal aim of the drive is to bring home high idealism and Americanism that dictated the Colonel's life, thoughts and actions.

DRY SOILS AND SOILS THAT BLOW

Farmers of the Pacific Northwest who practice dry farming, particularly those who operate in the Columbia and Snake River basins, will find questions of vital interest to them discussed in Farmers' Bulletin 1047, just published by the United States Department of Agriculture. The more progressive farmers of this region have developed methods of handling summer fallow that bring much higher wheat yields than those that have been generally followed hitherto. This bulletin describes in detail these improved methods as applied on both "blow" and "non-blow" soils.

SIoux FOREST AREA DECREASED

The President on September 2 signed a proclamation eliminating approximately 18,000 acres from the Long Pine Division of the Sioux National Forest along the Montana-South Dakota State line. The action taken is on recommendation of the Secretary of Agriculture, based on a detailed land classification made by the Forest Service.

The lands were found not to be of value for National Forest purposes.
