TRADE MARK REG.

With Three-Point Cantilever Springs New Overland 4 Seems to "Sail Over The Roads"

THE new Three-Point Cantilever Springs of Overland 4, by their special construction and design, protect car and passengers from ordinary road jolts. Bumping, twisting, swaying and vibrating are wonderfully lessened. The blows of the road seldom reach you. There is less tendency to bodily fatigue after long rides.

The springs of Overland 4 attached at the ends of a 130-inch Springbase give the riding comfort and road steadiness heretofore possible only with cars of long wheelbase and great weight, yet Overland 4 retains the light weight and economy advantages of 100-inch wheelbase.

Three-Point Cantilever Springs protect the car from the hammering and wear of road blows. They lengthen its life and reduce upkeep costs.

Equipment of Overland 4 is dependable and complete from Auto-Lite Starting and Lighting to Tillotson Carburetor.

250,000 miles of test have made the strength and endurance of this car a matter of record.

See Overland 4 at the first opportunity. Ask for booklet. Overland 4 Touring, \$845; Roadster, \$845; Coupe, \$1325; Sedan, \$1375. Prices f. o. b. Toledo.
