

HENRY P. WILLIAMS PETITIONS ARE OUT

Candidacy of J. R. Gathercoal also Rumored for Member of Township High School Board of Education

That the April election fever is spreading to all parts of the township is manifest in the unusual interest being taken in the township and the board of education elections which will be held on April 6 and 10. Although only one ticket has been proposed for the township officers the villages of Wilmette, Winnetka, Glencoe and Kenilworth are planning to turn out in full force to cast their ballots. The same is true of the high school board of education election which follows four days in its wake.

Two members to the board must be elected—one for a term of three years and another for a two-year period. The two-year vacancy is caused by the resignation of Edwin C. Austin, 1330 Sheridan road, Wilmette, who is moving to his new home in Evanston.

For the former office, Henry P. Williams, present incumbent and secretary of the board, is the most logical candidate. Petitions for his re-election are being circulated by friends, and his candidacy is receiving hearty endorsement by scores of residents of the township. Mr. Williams lives at 730 Bluff street, Glencoe.

The two-year term is more uncertain, although petitions nominating J. R. Gathercoal of Wilmette are said to have been circulated throughout the township by his friends, despite Mr. Gathercoal's reluctance to be a candidate. Mr. Gathercoal, who lives at 1438 Forest avenue, has been approached several times since the vacancy on the board became officially known. Reached by telephone last night Mr. Gathercoal reiterated his first statements that he had no intentions of becoming a candidate, but it is believed that the persistent efforts of his friends will win him over so that his petition may be filed before the time limit expires.

In reference to the filing of petitions, it was emphasized yesterday that all must be filed ten days before the date of the election, or by April 1. The polls for the school election will be open from 12 o'clock noon until 6 p. m.

"OH SKINNY, YOO-HOO, COME ON OVER, SCHOOL IS CLOSIN'"

One reason for the unusual hilarity displayed recently by children of all the township grade schools and the New Trier High school, too, is due, say parents, to the Easter week vacation, which begins in earnest on Monday, although the schools close after their Friday session this week.

"Skinny" and "Fatty" have planned all sort of jaunts into the country, re-exploring Skokie valley, etc., and it's going to be rather difficult to persuade them to return to school when the school work is to be resumed April 5. Some of the children in all the towns, Glencoe, Winnetka, Kenilworth and Wilmette have already made preparations for short visits to other cities but the majority of them, school officials say, will spend their time at home.

A few of the teachers in the schools expect to make hasty visits to friends and relatives but because of the limited vacation, most of them will remain here. In Wilmette J. R. Harper, superintendent of schools, is planning to spend four days at the home of his mother in Jamestown, Ohio, returning in time to prepare for the school opening.

LOCAL EX-BANKER AND SONS FOUND GUILTY IN CHICAGO

William H. Paisley, former banker and now employed by the Chicago, North Shore and Milwaukee Electric railroad as foreman, was found guilty with his two sons, Oliver and James T. Paisley, by a jury in the court of Judge Oscar Hebel of receiving deposits after their banks were known to be insolvent. It was the third conviction for the sons and the second for the father. The father lives in Wilmette.

The Paisleys were first convicted in 1916, the sons being sentenced to three years and the father to one. After a new trial was ordered by the Supreme court, the father was acquitted and the sons were fined \$1,400 each. Judge Hebel, in this week's verdict, imposed a fine of \$180 upon the elder Paisley and imposed equal fines upon the sons, as

well as sentencing them to serve from one to years in prison. It is understood an appeal of the case will be made.

Address

An Ice Machine for every home

HERE is a practical ice-making machine for home refrigerators. It is used in your own ice box. It is small, simple and compact. It is convenient and economical.

It insures you dry, cold, sanitary refrigeration, maintained always at an even temperature, by automatic control.

It very quickly pays for itself by saving the price of ice and by keeping expensive food from spoiling.

A miniature cold storage plant

The Kelvinator turns your refrigerator into a miniature cold-storage plant, as efficient in its proportion as the big commercial plants where food stays fresh for months.

It gives you a degree of cold impossible to secure with ice. This cold does not fluctuate, as in ice-cooled refrigerators. Neither is it damp, which produces mold and encourages staleness and unpleasant odors.

Thus expensive meats, eggs, dainty butter, keep fresh and sweet until you are ready to use them.

You can order food in advance and store it safely, without fear of loss by spoiling.

Freezes ice for the table

The Kelvinator also makes ice for whatever purpose you need it.

It freezes small cubes for table use. It chills mousses, frappes and sherbets.

This home-made ice is safe and sanitary—the only ice which is fit to use in drinking water.

It removes the danger of pollution and infection always present when the ice man's ice is used.

Commercial ice cannot be sanitary

It is not the fault of the ice man that the ice he delivers to your home cannot be sanitary.

He cannot insure the purity of ice cut from rivers and streams.

Even if it is artificially frozen from distilled water it must be delivered in open wagons, through dusty streets and handled repeatedly.

By the time this ice, natural or artificial, reaches your ice box it is unsafe for use in any connection with food.

**We can't fill all orders
If interested, write today**

Because Kelvinators are selling all over the United States faster than they can be made, the orders we can fill are limited. The number of Kelvinators allotted to us each month can't keep up with the demand.

Thus, if you are interested, if you want a Kelvinator installed by the time hot weather arrives, mail the coupon today, for the Kelvinator booklet. It explains all details necessary for your information. There is no obligation whatever involved. Send coupon today.
