

NEW TRIER SUMMER SCHOOL IS SUCCESS

Summer School Principal F.C. Windoes Tenders Interesting Report to High School Board

The accompanying report directed to the Board of Education of New Trier High school by Summer school Principal F. C. Windoes, setting forth briefly and comprehensively the work of the school, will be of interest to readers of The Lake Shore News, particularly parents who have a direct interest in this department of the high school work.

August 13, 1920.

To the Board of Education:

The summer session just completed was perhaps the most successful yet held at New Trier. About 235 students registered for the summer school work and approximately 93 per cent remained the entire eight weeks. Another encouraging feature of this year's summer session was the fact that 83 per cent of the students enrolled for two subjects. The registration this year was about 50 per cent larger than the registration in last year's summer school. This increase in the registration was especially gratifying in view of the fact that our natorium was not in use. The natorium has heretofore been an added inducement for summer school attendance.

Previous to the opening of the summer school a circular letter was sent to the parents of the eighth grade graduates, in which the advantages of our summer school were enumerated. As a result 50 of the graduates from the grammar schools were in attendance at New Trier. This means that about one-fourth of the incoming Freshman class will have become somewhat acquainted with high school work; this should tend to decrease the number of failures among the Freshmen this coming year.

The summary of the work offered was as follows:

Subject	No. of Classes	Teachers
Algebra	5	Grinnell, Kahler, Wright, Windoes
English	5	Hutchens, Whitfield, Wright
History and Civics	4	U'rich, Warburg
Geometry	2	Snyder
Latin	2	Small
Typewriting	2	Johnson
French	1	Glace
Spanish	1	Glace
Trigonometry	1	Kahler
Book-keeping	1	Grinnell

There was an average of seventeen students per class. Approximately 89 per cent of those who remained during the entire session receive school credit.

I feel that the greatest single factor which contributed to the success of our summer school was the loyal and unqualified support which was given me by the entire summer school faculty.

I take this opportunity to thank the members of the Board of Education for again entrusting me with the supervision of the summer school.

Respectfully submitted,
F. C. Windoes,
Principal of Summer Schools."

THE STUFF THAT COUNTS

The test of a man is the fight he makes.

The grit that he daily shows;
The way he stands on his feet and takes

Fate's numerous bumps and blows.
A coward can smile when there's naught to fear.

When nothing his progress bars,
But it takes a man to stand up and cheer

While some other fellow stars.
It isn't the victory, after all.

But the fight that a brother makes;
The man who, driven against the wall,
Still stands up erect and takes
The blows of fate with his head held high.

Bleeding, and bruised and pale,
Is the man who'll win in the by and by.

For he isn't afraid to fail.
It's the bumps you get, and the jolts you get.

And the shocks that your courage stands,

The hours of sorrows and vain regret,
The prize that escapes your hands,
That test your mettle and prove your worth;

It isn't the blows you deal,
But the blows you take on the good old earth

That shows if your stuff is real,

To labor with zest, and to give of your best,

For the sweetness and joy of the giving.

To help folks along, with a hand and a song,

Why, there's a real sunshine of living.

—Robert W. Service.

AUTO ACCIDENTS ARE ON THE INCREASE

Chicago.—With statistics showing that automobile accidents are killing men, women and children at an average of one every thirty-five minutes, the Ninth Annual Safety council, at its session in Milwaukee September 27 to October 1, will devote much attention to this serious situation.

In St. Louis, Cleveland and other cities local councils of the National Safety council have already reduced the number of automobile accidents by the united effort of public officials, civic organizations and public-spirited citizens, and it is planned to make the work nation-wide in scope.

S. J. Williams, secretary and chief engineer of the National Safety council, is authority for the statement that three times as many are killed in all public accidents as in all industrial accidents, including railroads, mines, public utilities, construction work, etc., as well as factories. According to present indications and the experience of past years, the number of automobile fatalities in 1920 will be about two-thirds of all industrial fatalities. This situation is alarming enough without exaggeration. The most alarming feature of it is that, while industrial accidents have been decreasing, due to the energetic safety work of the large industrial companies which are members of the National Safety council, and while the public accidents on steam and electric railroads have been decreasing as a result of similar work, the number of automobile accidents has been increasing very rapidly. Figures just compiled for the National Safety council by the statistical department of a large life insurance company show that the death rate from railway accidents per million of population has decreased in ten years from 130 to 105; from street railway accidents, from 36 to 28; from accidents on other vehicles, from 41 to 27; while the death rate from automobile accidents has increased in ten years from 8 to 92. The latter figure was reached in 1918, and recent figures from the larger

cities indicate that the rate is still going up.

Think It over--Advertise Advertising Is Economy

USUALLY
"What are you going to name the baby?"
"Nothing. What's the use? She'll only change it anyway, as soon as she get old enough to dislike it."—Judge.

"Life is getting to be such a bore."
"What's the matter now?" "Oh, I went shopping this afternoon and was only able to spend \$500."—Pittsburgh News.

The Falling of the Leaves Is the Call of the Gridiron

—not only for the "big-leaguers" of the game—but for the boys who tear up the turf on the corner vacant lot, as well.

Everything needed for football is here—shoes, helmets, shoulder guards, sweaters and, of course, a good collection of footballs—ranging from the inexpensive ones to those officially used in the Big Games.

Choose at Chandler's Sporting Goods Section—second floor.

Boys and Girls

will soon be wending their way towards the old school house again.

For these boys and girls we have assembled everything which they will need for school—both books and all supplies.

Do your book-buying early—and avoid the rush.

Sweaters for Fall

—and winter wear. We have every style, weight and price sweater that your fancy could desire.

Some finely woven jerseys; also splendid quality medium and heavy weight wool sweaters in both the slipover and coat styles.

Sporting Goods Section—Second Floor

Many Days of Golf Left

—Jack Frost won't "Call the game" for at least two months yet.

And, of course, NOW—as earlier in the season—we are in splendid readiness to serve you with all your golf needs—good clubs and a good variety of balls.

For Basketball We are

splendidly prepared to equip you.

Pants, shirts, shoes, stockings, knee pads are all here in broad assortment.

A Complete Sporting Goods Section

is now located on our second floor. Everything needed for any of the various sports can be found here in good assortment. See this new department on our second floor.

Typewriters
Office Furniture
Commercial Stationery
are here in good assortment

Starting With a Bang!

Many men who hunt the northern woods are being equipped with their needables here.

Shells, guns, target sets and other accessories.

Be ready for the season here when it starts next month.
