

Christ Church Scene Of Special Services

"Holy Week" to Be Observed in Variety of Services, Including Presentation of Cantata

There will be two main services in Christ church, Sheridan road and Humboldt avenue, on Good Friday, March 25. The first will be the Three Hour service, beginning at noon and conducted by the rector, with addresses and meditations on the "Seven Last Words."

In the evening at 8 o'clock, also in the church, the choir will sing the sacred cantata, "Olivet to Calvary," by James H. Maunder. Under the direction of John Rankl, choirmaster, and Chester E. Morsch, organist, the choir has had this work in preparation for some weeks past, and the service promises to be one of rare beauty and real helpfulness. The soloists will be Edmond Fulton, soprano; Paul E. McCreedy, tenor, and Charles Lewis Day, bass.

There will also be a service in the chapel on the morning of Good Friday at 10 o'clock.

On Maundy Thursday morning there will be a celebration of the Holy Communion at 7:30 o'clock; the children's service with an address illustrated by the stereopticon will be at 4:30 o'clock in the afternoon, and the service of Holy Communion in commemoration of the institution of the Lord's Supper will be at 8 o'clock in the evening. These three services will be held in the chapel.

On Monday, Tuesday and Wednesday of Holy Week there will be a celebration of the Holy Communion at 10 o'clock in the morning and evening prayer at 5 o'clock.

Telephone Attachments

Telephone attachments are being peddled in a miscellaneous manner throughout the country and are purchased by many subscribers and attached to their instruments. Generally these so-called "helps," disinfectants, etc., are of little account and frequently injure the service more than they improve it.

Many of these devices get the lines and instruments into trouble, whereupon the Company, to protect its service, is obliged to remove them.

Rubber earpiece attachments do not increase the sounds received, and often make it impossible to hang the telephone properly upon the switchhook. As good results can be obtained by covering one ear with the palm of the hand.

Telephone instruments, necessarily very sensitive and intricate, have been designed to produce the best results as they are. In the interest of good service, subscribers are requested to permit no attachments of any kind to their instruments.
