## Now Is The Time!

Right now is the time to prevent playing "freeze-out" next winter on account of an old, worn-out heating plant.

Don't try to "patch up" the old hot air furnace for next winter. You're merely piling up trouble in the way of excessive coal bills, discomfort and sickness. The cost of a new modern steam, vapor or hot water heating plant—one that brings joy and comfort to the home—will not greatly exceed the price of extra fuel and doctor bills that the old furnace will cost.

Have your heating apparatus overhauled, boilers cleaned, smoke pipes cleaned, valves packed, radiators redecored or grates fixed while the weather is warm.
