

# A Service Never Before Attempted

We are placing at the disposal of our patrons, or any responsible residents of the North Shore District, new Overland Four Touring Cars that may be borrowed in the same way a watch is borrowed at your jewelers.

For instance-- you have a trip planned for a certain day and the day before you strip a gear, break a pinion or are misfortunate enough to have your car unrunable-- you need not give up your trip, but may bring your car here for its needed repairs, accept the loan of one of our cars, and keep the schedule you had planned.

This service will be a handy thing for those people who hate to give up their cars long enough to have the needed paint job put on them. Our paint shop is fully equipped, ready to handle any kind of a job, and the men are as efficient as the shop. You may bring your car in, by appointment, take the Overland Four while your car is here and not be without, even for a day.

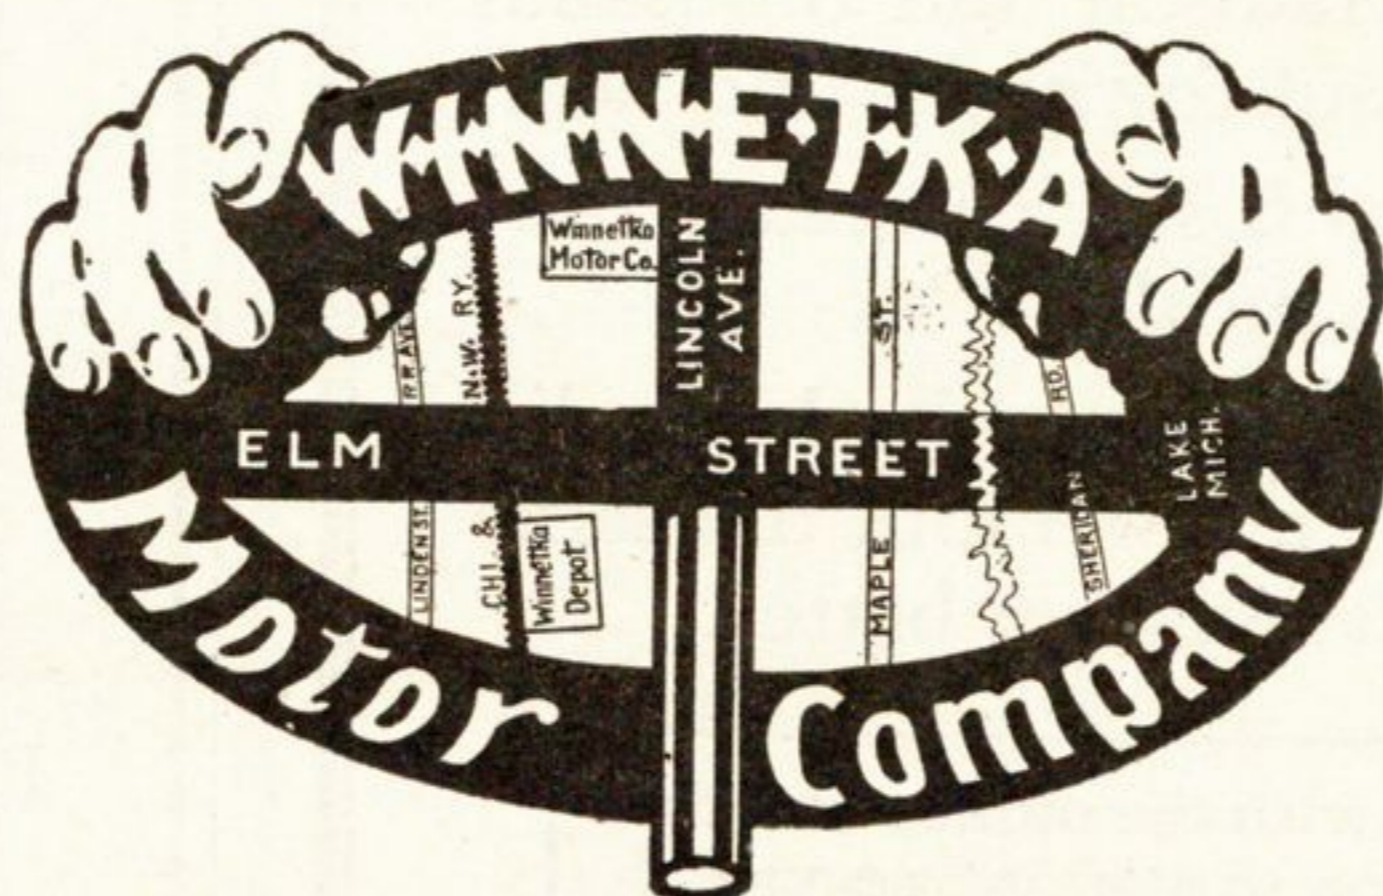

Electrical repairs, that re usually long jobs, rear axle repairs that necessitate new parts, with this service at your disposal, lose their seriousness, for all you have to do is step out of your own car into one of ours and drive away about your business.

There is a nominal charge by the day or by the mile and all we ask is that you are a responsible party and a resident of the territory that we supply with Overland Cars, repair and paint work.
