

A WORD

TO THE HOME BUILDER

For the man who plans to build, repair or remodel, this is certainly a favorable time. The country as a whole is four years behind in its building program, people must build soon and increased building is sure to bring higher prices.

The present situation is the result of forced selling by the manufacturers who have been caught by the lull in buying—and they must convert their stock into ready money. When building begins again they will be quick to ask their legitimate profit once more. If you buy now you can take advantage of this situation. If you wait you will buy when everyone else is buying and you will find the increasing demand forcing prices upward.

We have a complete line of building materials such as sand, gravel, cement, plaster, tile, brick, hair and flax insulators, asbestos, asphalt and cedar shingles, Bishopric and Ex-Wo wood lath for stucco, and all kinds of lumber.
