BUSINESS FACTORS

In predicting a gradual betterment of business, the Guaranty Trust Company of New York says:
"The scope of the light and power industry and the significance of its improvement is evident when we consider that—
"The total number of electric light and power plants in the United States is 6,478 and represent an investment of four and one-half billion dollars.
"The 4,558 commercial companies have nine million customers and total gross income of more than nine hundred million dollars and their securities are held by more than 1,400,000 investors.
"The light and power companies consumed more than 37,000,000 tons of coal and 13,000,000 barrels of fuel oil last year.
"The public utilities are making many phases of our social and industrial activities more economical, efficient and convenient.
"But, widespread as their service is, vast possibilities for expansion lie ahead of them. The field of transportation, distribution, communication, illumination and power must be developed as the business and population of the country increase.
"Prosperity in these activities means expansion, greater service and better business in general."

SMALLPOX DANGER IN SMALLER COMMUNITIES

Officer of State Department of Public Health says vaccination keeps Chicago out of danger

Springfield, Ill.—The general public, no doubt, is unaware of the deplorable conditions which exist throughout rural Illinois insofar as vaccination against smallpox is concerned. An officer from the State Department of Public Health recently visited DeKalb. Concerning his visit, the Chronicle, of that city, remarks:
"For years past the State Department of Public Health has urged vaccination as a prevention for smallpox, and it seems that each year Chicago has vaccinated to even a greater extent while the smaller cities and villages have paid no attention to the matter.
"The state officer going through this vicinity stopped at a little country school and stated his errand, asking permission to give the children a hurried examination. He found that out of 29 pupils enrolled, of which 25 were present at the time, but one child had been vaccinated. This condition exists all over the state with the exception of Cook county.

Danger of Epidemic

"The officer said that when one stops to consider the size of Chicago and considers the fact that there has been very little smallpox contagion there this year, it is indeed deplorable that small communities should suffer an epidemic. He also stated that under conditions as they exist in DeKalb county at this time, should one or two cases of smallpox break out, there would be an epidemic.

"The health officer also commented on the apparent disregard of warnings regarding diphtheria. He said that if children were given toxin-antitoxin, the chances for a diphtheria epidemic in this community would be reduced to a minimum. As it is, no one knows when several cases may be found and then the epidemic."

The conditions above named are by no means local; they exist broadcast throughout the state. Co-operation with local boards of health; where they exist, and the prompt organization of such boards where they do not exist, or at least where they are not functioning, will prevent much sickness and many deaths in Illinois.

ANNOUNCE EXAMINATIONS FOR WEATHER MAN'S AID

Springfield, Ill.—Examinations for the position of Assistant Observer in the Weather Bureau will be held on January 11, February 15, and March 22, according to an announcement made here. The examinations will be held at the following places:

Decatur, Effingham, Quincy, Springfield and Urbana. The subjects covered are: Meteorology (elementary) Penmanship, English composition upon some meteorological subject, elementary physics, mathematics (arithmetic and algebra), copying and cor-

recting manuscript, geography of the United States.
Applicants are advised to apply to the U. S. Civil Service Commission at

Washington or to the secretary of the local examining board at any of the above named places.
