FREE RUBBISH SERVICE

The Public Works department of the Village, renders a free collection service for the routine removal of household rubbish, calls being made on regular schedule, every two weeks throughout the year. The cost of this service is defrayed by general taxation, the levy being two-tenths of a mill per dollar of assessed valuation.

This service is available to every resident of the Village, whether the householder is paying for garbage and ash collection service or not. The free rubbish service can only be given, however, in case the material for collection is restricted to household rubbish, namely tin cans, bottles, broken crockery, discarded household equipment and similar rubbish. Material which can be burned, such as papers, old lumber, etc., cannot be taken nor is the income of the Village sufficient to extend the service to the collection of grass cuttings, broken concrete, brick bats, or any material from house remodeling jobs.

The rules require that rubbish for collection be placed in containers which can be handled by the collector, outside the rear of the building at an accessible point. It is not necessary to place rubbish at the curb, except during "Clean-Up Week" in the spring.

New residents may secure information as to the days for collection in their locality by calling the Village offices, Winnetka 860. Special calls, on request, will be made on Saturdays. Any irregularity in service should be taken up at once with the Village offices, where the matter will receive prompt attention.

SHRUBBERY SHOULD BE TRIMMED

The rainy weather during the past month has caused a rapid growth of shrubbery and many cases exist where branches of shrubs and trees extend over the public sidewalks of the Village and cause considerable inconvenience to pedestrians, especially in wet weather. This condition has prompted the Village to send out a post card notice this week, requesting the co-opera-

tion of residents in observing the ordinance covering the trimming of shrubbery.

RAILROAD REQUESTED TO REPAIR DRIVEWAY

The deplorable condition of the west driveway of the Chicago and Northwestern railroad at the Elm street station has been called to the attention of railroad officials by the Village Council and it is expected that repairs will be authorized by the railroad in the near future. The Village authorities have been trying to secure a permanent base pavement here for some time, anticipating that the increased traffic of the Village would cause the condition now existing. Railroad officials have plead the necessity for economy, however, with resulting inconvenience to the patrons of the road, using the Elm street station.

The Village has offered to build up the driveway with a good macadam base and to surface with Tarvia, using the Public Works department organization, at actual cost to the railroad, and it is anticipated that the proposition will be accepted soon.

VILLAGE STARTS PARKWAY MOWING

The Public Works department has started cutting grass on street parkways in front of vacant property. It is expected that all owners of improved property will keep their parkways mowed as a matter of civic pride.

"I Trade at Taylor's"

BECAUSE

I can get just what I want.

I get it quickly.

I am waited on by able and willing salesmen.

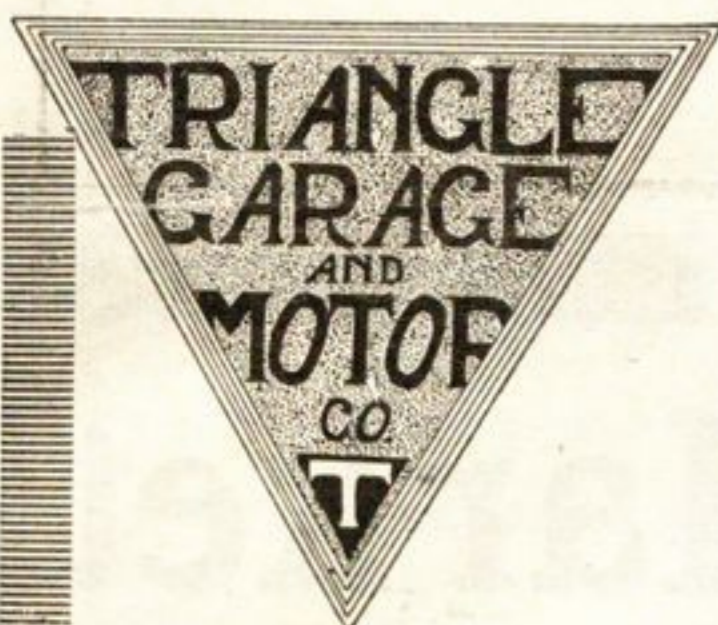

It's a big store full of up-to-date and varied articles

It's pleasant and profitable to visit such a place.

They act as if they like me

"That's why I'm urging you to trade at TAYLOR'S"

(This was volunteered by one of our customers)
