Announcing the GUMMITE CASE

Here at last is a battery case, moulded in one complete form, including partitions that separate the cells, as well as ribs to support the separators and plates. Individual jars for cells are done away with.

The Gummite case, now available with Exide Batteries, is practically indestructible. It contains no rubber, is not affected by acid or water, heat or cold—and it will not warp.

Come in and examine the remarkable Exide Gummite case.

We Start Balking Motors and Stop the Cause

It doesn't follow that a man is a good auto mechanic because he's a good hand with a wrench. We can't tell by looking at a car just why it won't run, but we quickly locate the cause and stop *that*—reasonably.

When accident breaks your body glass or windshield, come to us and have it replaced with genuine plate glass. It stands vibration and road-shock as common glass can't—and it is free from defects like prisms, hollows, bumps and humps.
