

NEW TRAINING CHIEF FOR VETERANS' BUREAU

The administrative offices of this District of the United States Veterans' Bureau announces the appointment of Mr. C. E. Hostetler as Chief, Rehabilitation Division, 8th District, replacing Mr. Charles W. Sylvester, resigned.

Disabled ex-service men in training under the Bureau in this District are exceedingly regretful of the loss of Mr. Sylvester. When the Government opened the first office of the old Federal Board for Vocational Education at Chicago, Illinois, in October 1918, Mr. Sylvester was appointed District Vocational Officer in charge of all work pertaining to the re-training of our disabled soldiers. Previous to this, he had been acting as Special Agent at Washington in organizing of District No. 1. Before coming to the Federal Board, Mr. Sylvester had held many important positions in the educational world. He was Director of Vocational Education at Hammond, Indiana, for two years; Director of Industrial Education at Springfield, Illinois, for two years; and Supervisor of Industrial Training Courses at Indianapolis, Indiana, for one year.

This work enabled Mr. Sylvester not only to enter intelligently upon the problem of re-training disabled soldiers, but to carry forward that work with the utmost speed and efficiency. From an office consisting of ten people, this District grew to have a personnel numbering over seven hundred people.

A MECHANICAL MARVEL

Do you know that in your basement you have one of the mechanical marvels of the last century?

It is the gas meter: The little black box whose dials the meter man reads each month. Invented by William Richards in 1844—seventy-eight years ago—inventors have vainly striven to improve it. Only a few minor improvements upon it have so far been possible.

The gas meter is declared to be one of the most accurate and positive measuring devices ever invented. Put 100 of the best watches to the same varying conditions of heat, cold and humidity, and the meters will win out every time.

—American Gas Association.

KANSAS CITY CUTS DOWN ON ACCIDENTS

Fewer Fatalities Despite Population Increase

Kansas City, Mo.—Although Kansas City's population has increased perceptibly during the past year, accidents have shown a decrease.

Figures issued by the Safety Council of the city show a total of 113 accidents for the eight months ending August 31, 1922, whereas 112 accidents were recorded for a similar period in 1921. And, motor traffic here has increased 20 per cent in the last year.

Vehicular accidents have been scarcer the last eight months, there being fifty-one as against fifty-four for a corresponding period last year. However, there were eleven collisions in August this year and only three in August, 1921.

Ford and Dodge Agencies Are Welcome to This Bit

Surprising as it may seem, Fords and Dodges reign supreme as modes of travel in Luxembourg.

For this startling information we are indebted to our sterling friend, Andrew Hostnick, former north shore automobile expert, who has been observing Europe through the spectacles of a tourist, and is now homeward bound on the Olympic.

"Andy" has furnished a constant supply of information about Europe

SCHOOL OF SPEECH WILL HAVE GRADUATE COURSE

Indications are that Northwestern University School of Speech this year will have a ten per cent increase in registration, according to Director Ralph Dennis, who is keeping close tab on these matters. The total registration in this school should run up to 200, the director thinks, and plans are being laid for an intensive year. Director Dennis also announces the establishment of a year's graduate work principally in argumentation and persuasion whereby the student may acquire the degree of master of arts.

The School of Speech at Northwestern already has a four-year course, two years of which are taken in the College of Liberal Arts, which leads to a bachelor's degree but the work for master of arts is new. Northwestern University School of Speech is one of two university schools of this description existing in the United States. The other is at Syracuse, New York. Other schools given over to the teaching of dramatic speech, acting for the stage and so-called "oratory," which now seems to be a bit passe, are private schools not under university supervision.

through the "lean summer months." Scarcely an issue has missed his interesting, albeit laconic postcard items. He'll have a real big story upon his return that will appear in an early issue of this paper.

Tired of Being Tired?

If weariness overtakes you every day, it may be caused by shoes that bind the feet, that check the circulation, or that cause strain and nervous derangement by encouraging poor carriage. Foot ills and, indirectly many serious ailments may result from wearing shoes that pinch the muscles, press on the nerves and weaken the arch. To correct foot troubles, and to increase your comfort and vitality, change to the Cantilever Shoe. It is a trim, good-looking shoe, patterned on the graceful lines of the foot, made of the finest leathers.

Instead of a stiff sole, the Cantilever Shoe has a shank flexible like the foot arch itself. The shoe bends with every step. The muscles grow healthy with exercise. The result is a normal foot, which does not tire from long standing or walking.

The Cantilever last conforms to the foot. The toes are not twisted, but point straight ahead. The foot lies in its natural position, as it would in a moccasin. This, with the correct set of the smart moderate heel, encourages an easy, untiring posture. Try a pair this week, and let nature help you.

ABC OIL BURNER

Operates Perfectly in any Heating Plant!

Your present heating plant—without the slightest alteration—can be converted to a perfect, automatic oil heater by installing ABC Oil Burner.

Your heating troubles cease to be.

Always—regardless of outside weather conditions—there is uniform, automatic heat throughout your home.

There are no chores in connection with ABC Heat. Coal, ashes, shaking and banking fires, dust, soot, smoke, and an untidy basement pass out with the coming of ABC.

It is positively automatic heat—automatic both as to operation and regulation. There is no auxiliary oil tank in the basement to be pumped by hand. Have the outside storage tank filled and that's all you have to do.

The way to judge ABC is to see it operate and know the opinions of those who use it.

Our show room is open every day and evening. Come in tonight. We will demonstrate ABC Oil Burner and give you the names of many North Shore owners.
