Davistone Clear Speaker Wins Radio Fans' Approval

Winnetka radio fans are evincing a more than ordinary interest in the Davistone Clear Speaker, now being extensively advertised, in view of the fact that the company back of this product is made up principally of Winnetka men.

There is every indication that the Davistone Clear Speaker will be an important factor in the development of the radio industry, because through the Davistone horn messages can be made clear and distinct in a room crowded with people. The material, Davistone, is a patented composition and may be adapted to other uses later on which will be even more important than that of making radio horns.
