

**Jottings From
New Trier High**

The junior and senior orchestras established a reputation for themselves in their excellent concert during the Assembly last Friday. The junior group, consisting largely of freshmen and sophomores, was led by Katherine Hamilton and Kathrine Granquist. A quartet composed of Katherine Hamilton, Geo. Swigart, Olga Reinhold, and Estelle Swigart rendered two movements from a Haydn Sonata—The Scherzo and Finale.

most applause was the Andante from Tschaiakowsky, 5th symphony. Few high school orchestras aspire to symphonic music. This particular one with its cross rhythms and difficult measures for strings, brass, and reeds meant a real achievement for our students.

Mr. Sievert, a visitor from Boston, who has been inspecting the musical departments of leading high schools in America, complimented Mrs. Cotton upon having such a splendid orchestra. Altho he had recently heard the orchestra of Pittsburgh High, Grand Rapids, and many others, he said that New Trier's organization played with the finest interpretation of any he had heard.

The selection which received the

**Judge
oil burning heaters
by the
Orsat Test
it's simple
and infallible**

The first practical automatic oil-burning home heater was a Nokol, installed five years ago. Doubtless you know that more than 8225 Nokols are giving satisfactory service today; that the new Nokol, refined in every detail, embodies all the lessons of the most extensive experience. Yet there are other heaters on the market—you may think: "Maybe they are an improvement on the Nokol principle."

Here is the simple way to decide. Judge all oil-burning heaters by the Orsat test—the standard by which heating engineers judge. The Orsat test shows precisely the combustion efficiency of your heating device, be it Nokol, coal or what not.

The average home heating plant burning coal shows a combustion efficiency of less than 50% by the Orsat test. Nokol—installed in the same home heating plant without alteration—will show a minimum combustion efficiency of 85% by the same test. This we guarantee. It is a figure that has never been approached by any other home heating device.

See the Orsat test demonstrated at our show room. It's your simple infallible guide to the purchase of an oil-burning heater.

Nokol burns oil in your present heating plant and does away forever with the uncertainty, dirt and drudgery of coal heating. Nokol can be installed in any type of home heating plant—steam, hot water, vapor or hot air—without alterations. Nokol operates automatically—the temperature is perfectly controlled by a thermostat.
