### Winter Pruning

Of trees and shrubbery should be done now. This work of rejuvenating and cleaning out is much more important than is generally supposed.

Only a man of long practical experience can distinguish between flowering wood and useless growth.

Our experts know where, and how much to cut away, and what to leave untouched.

### Winter Protection

Now that the soil is frozen a good coating of fertilizer should be spread over the shrubbery beds—especially those newly planted.

We can supply the fertilizer and spread it properly. Have your trees and shrubs properly cared for.

### "Milk For Men"

Too great importance cannot be placed upon the value of milk as a builder and preserver of health.

It is, of course, well known that milk is indispensable to the health and well-being of babies and children.

But as these children grow up they get away from the milk habit with the result that their health and strength is not as good as it might be.

Physicians are now urging the regular use of milk—by both men and women. It is the straight road to happy health.
