

The Husband

with his responsibilities as the head of the family, will not live in an atmosphere of hopeless struggle, if he has a savings account.

The rainy days of sickness and adversity, have no terrors for the man with the **savings habit**, because the small amounts deposited at regular intervals, quickly grow into a sum that will meet any ordinary emergency or mishap, that may come to his family. Ready money, is his constant and substantial friend.

Our Savings Department, will start you with a dollar or more, and pay 3 per cent for your money.

WINNETKA TRUST and SAVINGS BANK

INCOME TAX

Editor's Note: Accompanying is the first of a series of brief articles of informative value to the average taxpayer in the making of his income tax return for the year 1922.

Revenue officers are visiting every county in the United States to aid taxpayers in the preparation of their income tax returns for the year 1922. Information concerning the date of their arrival and the location of their offices may be obtained by writing the collector of internal revenue for the district in which the taxpayer lives.

Forms for filing returns of individual net income for the year 1922 are being sent to taxpayers who filed returns for the year 1921. Failure to receive a form, however, does not relieve the taxpayer of his obligation to file a return and pay the tax on time, on or before March 15, 1923. The forms, 1040A for filing returns of net income \$5,000 and less and 1040 for filing returns of net income in excess of \$5,000, may be obtained from collectors of internal revenue and deputy collectors.

Returns are required of every single person whose net income for 1922 was \$1,000 or more or whose gross income was \$5,000 or more and of every married person whose net income was \$2,000 or more or whose gross income was \$5,000 or more. Careful study of the instructions on the forms will greatly aid in making a correct return.

Gardner Car Accomplishes Smoothness in Operation

In the five-bearing crankshaft which is the feature of the Gardner motor for 1923, Gardner engineers have found the way to build a four-cylinder engine of exceptional smoothness in operation.

A five-bearing crankshaft in this type of motor represents an important advance in automotive engineering. This feature is one of the leading attractions at the show.

Ordinarily, the crankshaft of a four-cylinder motor has only two bearings. By using five bearings with a total bearing surface of 65 square inches, the shaft is held in perfect alignment. Whipping is prevented and shaft and bearing wear is reduced to a minimum. The motor operates with smooth, multi-cylinder performance and runs through its range of speeds without a vibration point such as is found in most automobile engines.

Previous Gardner power plants have power and dependability. With this added advantage of consistently smooth performance under all conditions, the Gardner Four is expected to make an even greater appeal to 1923 buyers.

ELECTRICAL "DON'TS"

Don't leave the electric flatiron connected to the circuit and go to use the telephone, visit with the neighbors or to call at the grocery.
Don't use lamp cord wiring in your home. It is unsightly and unsafe.
