

INVITE BOYS TO CAMP ROOSEVELT

Enrollment Records Already Shattered

North shore boys are again invited to attend Camp Roosevelt, the national summer educational-training encampment at Silver Lake, Ind., under command of Major F. L. Beals, U. S. A. Word to that effect has just been received by school authorities from Peter A. Mortenson, superintendent of Chicago public schools. The first contingent will reach camp for the opening of summer school on July 2. Those who will attend the other divisions of the camp (R. O. T. C. or military division, and the Junior Camp) will follow a week later, reaching there on July 9.

Highly Approved Prospect

Camp Roosevelt is attracting nation-wide attention because of its unique policy for giving boys, on the basis of a public institution, a course of highly specialized training, excellent care and food equal to that of the finest private camps. This is made possible through the support of the Chicago public school system, the War Department of the U. S. Government, American Red Cross, Y. M. C. A., Chicago Dental society, and public-spirited Chicago men who bear all financial burdens. Boys 10 years and over, from all parts of the country are privileged to attend. A three weeks' outing, under finest possible conditions, costs each recruit \$30 for the training, mess privileges, and healthful outdoor vacation.

Enrollment Record Broken

Major Beals, whose office is at the Board of Education, 460 South State street, Chicago, stated in a recent interview: "All previous records for enrollment at this early season have already been broken. Pennsylvania, Georgia, Tennessee and Texas are the more distant states represented, and this does not mean that only one application, but several, have been received. Of course, the nearby states are, as always, more popularly represented. I attribute this to the splendid location and facilities which the Indiana campsite, to which we moved last summer, affords. Every one of our boys benefited from training, and at the same time had a splendid time. At any rate, that seems to be the impression of the early registrants, the majority of whom are "repeaters."

LEONARD ORTH DIES; WAS ILL FOUR DAYS

Leonard J. Orth, 23 year old son of Mr. and Mrs. James J. B. Orth, died at his home, 522 Laurel avenue, at 5 o'clock Friday night, March 23. Death came after an illness of only four days.

William Schissler, Christian Science leader from Sheboygan, Wis., conducted the funeral services which were held from the Orth home Tuesday afternoon. Later in the day Masonic services were held from the Graceland chapel, Chicago. Burial was at Graceland.

Leonard Orth was born in Milwaukee in 1900. After living with his parents in Minneapolis for a peri-

od of years he moved to Wilmette in 1914. He attended the Evanston academy, was graduated from the Lake Forest academy and last June was graduated with high honors from Dartmouth college.

At the time of his death Mr. Orth was in the employ of the Gilbert D. Johnson, real estate company at Winnetka.

He was a member of the Delta Kappa Epsilon fraternity and during his last year in college was the president of his chapter. In the same year he was treasurer of his class. Mr. Orth was also a member of the Wilmette Masonic lodge.

The average rate of cash fare charged by the electric railways of the country is now 7.3 cents, according to the latest compilation. The highest average was reached on November 1, 1921, when the figure was 7.46 cents.

A good many screen stars are not strong on literature. Barbara La Marr read that the Kaiser was to receive \$1,000,000 for his publications and exclaimed. "That seems hardly enough when you consider Milton got \$30 for "Paradise Lost."

We Have Been Studying

for years the question of good taste in glasses.

A walk down the street, half an hour in almost any company, shows a discerning man or woman the need for such a study.

So many pairs of glasses, all right in themselves, are not suited to those who are trying to wear them.

It is not a question of the glasses, or of the people. Merely one of getting the right glasses and the right people together.

As we have been doing for more than a third of a century.

CADILLAC

That reliability of performance for which the owner prizes his Cadillac is the manifestation of a thousand refinements of design—the achievements of more than twenty years of continuous engineering effort.

Since the first Type 61 appeared there have been numerous unheralded but important betterments of this current model. Carburetion, for example, is now thermostatically controlled and automatically adjusts itself to all climatic conditions. A saving of more than 10% in gasoline consumption is thereby effected, at the same time, giving more rapid acceleration and insuring quick and easy starting even in the most severe weather.

To such patient and talented efforts over a long period of years is due in a large measure that superlative performance for which Cadillac is preferred.
