

PUBLIC LINKS IN GOOD SHAPE

Tags Are Now Ready for Distribution

The Playfield Golf course in the Skokie, supervised by the Winnetka Park board is to be in excellent condition for play this season, according to the following official announcement communicated to the Winnetka Talk this week.

"The Winnetka Park board takes pleasure in announcing that through the painstaking work of Mr. Runfeldt and his assistants the public golf course is in the finest condition at any time since its opening as a public playground. Through suggestions of the Playfield association and the constructive suggestions of many other citizens some minor changes have been made which will unquestionably add to the convenience and pleasure of the public. Walter Stelzel is already on the ground and will act this year as professional and starter.

"The course has been used on account of the unusually dry April, although the regular greens are not in use and will not be until the ground is fully settled so that they may be kept in first rate condition when the official playing season opens about the middle of May.

"Notices are going out to the public this week and tags will be ready for distribution by the time this notice reaches the public. The Park board is anxious to co-operate with those interested in the game of golf to the point of making the public course not merely a place to play but a place on which good golf is possible. The board therefore, urges that the citizens of Winnetka co-operate to the fullest extent both in suggestions as to the improvement of the course and as to creating a community pride in what is probably a unique feature of our village."

THE PUBLIC FORUM

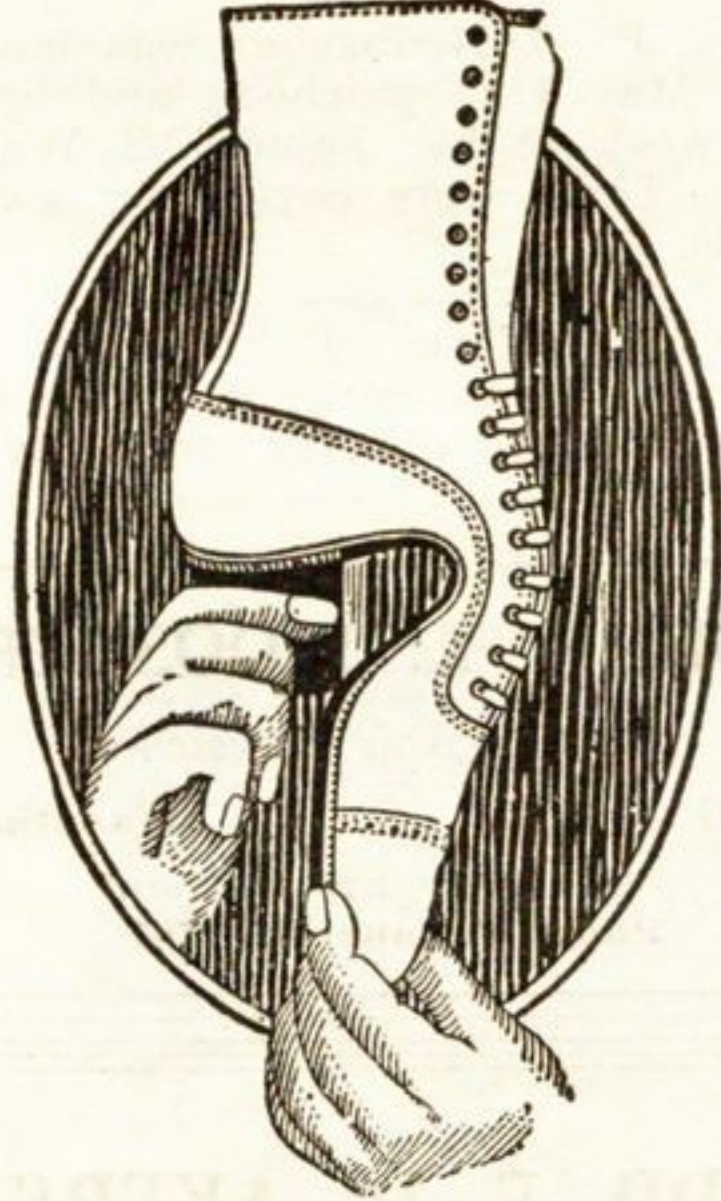

Editor's Note: Special request was made by Health Commissioner C. O. Schneider at this week's meeting of the Village council that the petition signed by seventeen physicians of the village and requesting that the plat of subdivision of the Alles property in the southwest of the village bounded by Willow street, Glenwood avenue and Sunset road be not approved because of alleged unhealthful conditions in that vicinity, is published herewith for consideration by the readers of the Talk.
To the President of and Trustees of the Village of Winnetka.

Gentlemen:

Whereas we are advised by Dr. C. O. Schneider, Commissioner of Health, that your honorable body has received, or is about to receive, for your approval, maps or plats with request for subdivision into building lots, of parcels of land located in that relatively low, undrained and marshy western portion of the Village of Winnetka, known as the Skokie, and as this subdividing probably contemplates the sale of these lots to persons who would soon expect to build homes thereon, and as these persons may not be properly advised of the unhealthful conditions there, due to the absolute lack of facilities for storm water drainage, and as it is a well known fact that at certain wet seasons of the year these acres do become flooded, and that even under present conditions, householders, although more favorably located on higher ground adjoining the Skokie, complain because of the unsanitary conditions due to several feet of water in their basements, with furnace fires out and sickness resulting therefrom,

Now, therefore, in the interest of public health, we, the undersigned, Physicians, residing or practicing in the Village of Winnetka, hereby petition the Council to take no action that will in any way encourage the sale or use of such Skokie property for residential purposes until such time as a permanent and comprehensive system of drainage is actually installed.

Respectfully submitted,
C. O. SCHNEIDER, M. D.
G. M. LOEWE, M. D.
B. E. FILLIS, M. D.
H. C. BALLENGER, M. D.

A Comfortable Smart Shoe

There is no need to wear shoes that tire your feet, cramp your toes, restrain and weaken your arch muscles. There is a good shoe which is smart in appearance as well as correct in shape—the Cantilever Shoe.

Its primary purpose is to make the foot comfortable. But it is also good looking, and has those excellent features which brought it the endorsement of health and educational authorities and foot specialists.

The line of the Cantilever Shoe are so graceful that you would hardly imagine it possessed a natural sole line, room for the toes without crowding, good heels rightly placed, a flexible arch permitting free circulation and free action of foot muscles.

The woman who risks her health by wearing poorly shaped shoes is invited to come and see Cantilever models. Many women who have changed to Cantilevers for daytime wear acknowledge that good-looking shoes which are properly shaped are a source of satisfaction and happiness.

By wearing the Cantilever Shoe, you will have foot comfort and the peace of mind that follows when the feet are no longer a source of annoyance. Try it.
