Skokie Country Club Offers State Silver Trophy

The Western Lawn Tennis association announces all preparations have been completed for the Illinois State Tennis Championship tournament to be held on the clay courts of the Skokie Country club at Glencoe the week of July 2 to 8, inclusive.

Leading tennis stars from every part of the country will compete in this great event, which promises to be of nation-wide interest among the followers of the net sport.

Included in the events of the tournament will be the men's singles and doubles, women's singles and doubles, junior boys' singles and doubles, junior girls' singles and doubles, and boys' singles and doubles.

Tournament Regulations

The tournament is open only to players who are members of clubs affiliated with the United States Lawn Tennis association, the Western Lawn Tennis association or district associations, or other subsidiary associations of the national association. Matches will be the best two out of three sets, excepting men's semi-finals and finals, which will be the best three out of five sets. Play will commence at 10 o'clock A. M. and 2 o'clock P. M. each day, unless otherwise arranged. First and runner-up prizes will be awarded in each event. The State trophy, a silver bowl, put up by the Skokie Country club, was won in 1921 by Walter T. Hayes, and last year by William T. Tilden II. The trophy becomes the property of the player winning it three times.

KINDERGARTEN SCHOOL BEGINS SUMMER STUDY

The National Kindergarten and Elementary College formally opened its Summer session on Tuesday afternoon, June 19, with a reception to incoming students and a lecture by the president of the college, Miss Edna Dean Baker. Representatives from twenty-six states responded to roll-call, including young women from Texas, Tennessee, Massachusetts, Virginia, California and New Mexico.

President Baker spoke on "The Objectives for Teacher Training" at the College. "The ability to place the education of children on a scientific basis is a first essential," said Miss Baker. Progress in school is measured each year by a more scientific yardstick as standardized tests become the tool of every teacher. Such measurement does not disturb the spontaneity and self-expression of the child. If the time comes when we can compute the growth in purpose as accurately as we now weigh a pound of butter we shall not have less but more purposeful children.

The ability to maintain health for themselves as teachers and for the children in their care is no less essential in Miss Baker's estimation.

Another objective which challenges today, she said, is the ability to guide the moral and social development of children so that right habits and attitudes are formed in these early years. "In this age of the aeroplane, the radio and the automobile," said President Baker, "it is increasingly difficult to keep God and the great moral principles of our American fathers in the child's world. On every side are signs of moral decay and social mal-adjustment. Our schools need supremely teachers who are alert to the situation and who with unerring skill meet the subtle inner foe that perils our civilization."
