

# In The Fall

You may not be able to get your coal just when you want it. Summer strikes in the coal fields may raise prices and cause disagreeable disturbances.

## BUT NOW

You can get good, clean coal at moderate prices.

With next winter's supply of your favorite coal in your cellar you will be unaffected by any fuel emergency that may arise.

If you need building material, remember that we have on hand the standard grades of lime, cement, tile, sewer pipe, brick and sand.
