**FADS**

"Food fads" and "fool fads" are synonymous terms in lots of cases, according to state health officials. Going without breakfast, trying to live mainly on coffee, depending on yeast cakes for vitamin, drinking a quart of warm water before breakfast, eating raw food principally and leaving such things as eggs, milk and vegetables out of your diet is much more ridiculous and equally as serious to health as making a glutton of yourself.

**Mothers Know Best**

Childish tastes usually have to be curbed rather than encouraged—especially when it comes to delicacies.

But Ice Cream, made the Hydrox way, is nutritious as well as delicious—the most tempting as well as the purest and safest of foods.

And mothers know how important high food value is to growing bodies and minds. They know that the ice cream which contains 75% more pure cream than the state law requires must be a wonderful brain and muscle building food for their little ones.

The fact too that Hydrox Ice Cream is Carbonated—frozen in an atmosphere a hundred times purer than air—satisfies them thoroughly on the score of purity.

That is why so many mothers allow their children to eat all the ice cream they want, but always insist wisely that they buy it from a Hydrox Agency.
