

GUY MAIER IN CONCERT HERE

Famous American Pianist to
Be Heard at New Trier
Hall, March 5

ORCHESTRA BENEFIT

Program Designed to Inter-
est Young and Old

Guy Maier, American pianist, is to appear in concert at New Trier Township High school Wednesday afternoon, March 5, which is to be in the nature of a benefit for the High school orchestra.

Mr. Maier is best known in Chi-

Guy Maier

ago through his association with Mr. Lee Pattison in their two-piano performances. They have appeared for three consecutive seasons with the Chicago Symphony orchestra, the last time being a week ago when, with Mr. Arthur Shattuck, they played a Bach concerto written for three pianos. "Mr. Maier," say those who are sponsoring the New Trier concert, "is not only a brilliant pianist, but his programs for young people and children stand in a class by themselves.

These concerts are so popular in eastern cities that the demand for tickets exceeds the seating capacity of even the larger auditoriums. Mr. Maier says these programs are for children up to 80 years of age. His story-telling gift which is both verbal and pianistic transports both young and old to the land of dreams come true.

All the proceeds from this concert, above expenses, will be given to the New Trier High school orchestra.

Tickets Going Fast

Tickets are being sold rapidly so that in order to obtain seats it is advisable to secure tickets within the next few days, it is said. Tickets may be secured from the following persons:

Wilmette—Miss Ethel Flentye, 729 Lake avenue, and Wilmette Music Shop. Kenilworth—Miss Florence Newport, 520 Abbottsford road, and Mrs. Ernest Fleischman, 325 Leicester road. Winnetka—Mrs. Ernst Von Ammon, 420 Elder lane; Mrs. P. B. Kohlsaat, Woodland avenue, and Music club of New Trier High school. Glencoe—Mrs. George E. Orr, 755 Grove street.

HERE'S A HINT ON BATTERIES

Abel Gives Some Advice on
Charging

A great deal has been said, according to Mr. U. C. Abel of the Winnetka Exide Service station, about the dangers of overcharging an automobile battery, but the fact is that there is much more damage actually caused by undercharging.

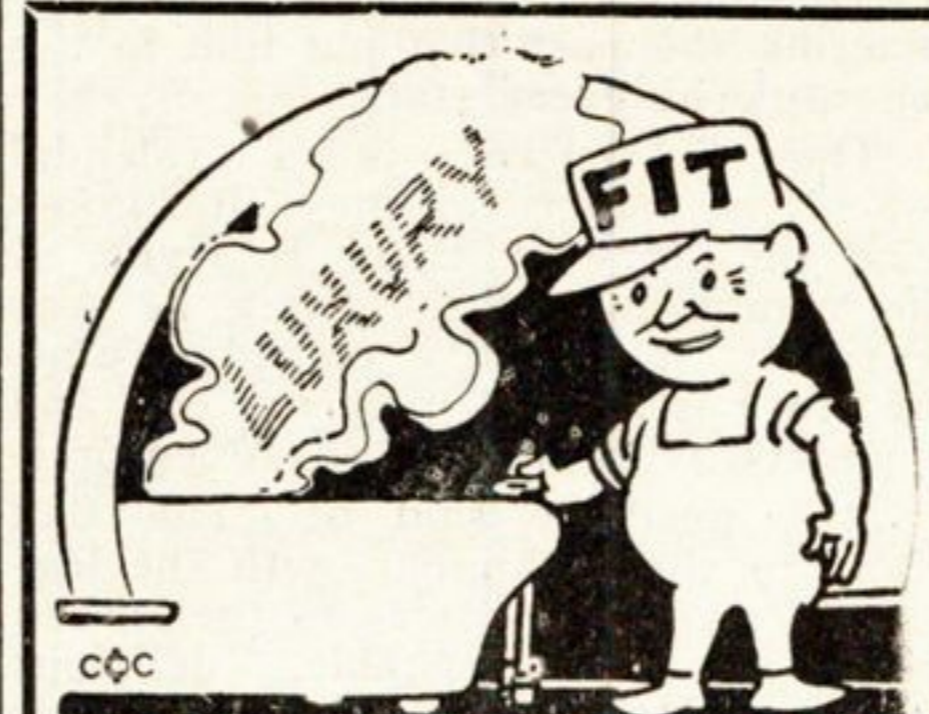

"The ideal conditions under which a battery should be operated," said Mr. U. C. Abel, "are those in which the input of current from the generator fully compensates for the amount of current consumed in starting, lighting and other purposes. Doing this of course, depends a great deal on the driving conditions under which the individual car owner operates his car, but it is safe to say that a considerable number of generators are not properly adjusted to these driving conditions.

"Car owners do not generally realize this point, especially when they install additional units to their cars such as electric cigar lighters, spot lights, windshield wipers and other accessories which depend on electric current for operation.

"It would be a good practice for every car owner to have his generator charging rate periodically check-

ed up by an expert, regardless of how long or short a time he has had his car. When leaving the factory, the charging rate on the car is set as near as possible to take care of average conditions, but as the car manufacturer cannot tell how every car owner is going to use his car, it is impossible for the factory to adjust the charging rate particularly to his needs.

"In the winter time a battery is subjected to excessive discharging because of the amount of heavy cranking necessary to start the car, and normally it is to be expected that a higher charging rate is advisable during cold weather."

THE GREATEST OF
ALL LUXURIES —
ARE BATHROOM FIX-
TURES THAT WILL PLEASE

GOOD, dependable, attractive bathroom fixtures bring more comfort and joy to the home than all of the gilded trappings ever set up in a drawing room. For the sake of your own family and guests see that your bathroom is one to be proud of. You will be if we do the work.
