## Beautify Your Home

Turn those bare, unsightly places into spots of beauty. It is so easy with our specially designed trellises. A vine or a climbing rose planted this Spring will soon cover the trellis and furnish a decoration for your home which can not be equalled for beauty. Furnished in five different designs to harmonize with any surroundings.

We also have many other practical home ornaments, two of which are shown below. Our all-wood mail box is something every home should have. No rust to discolor your mail. A place for papers as well as letters.

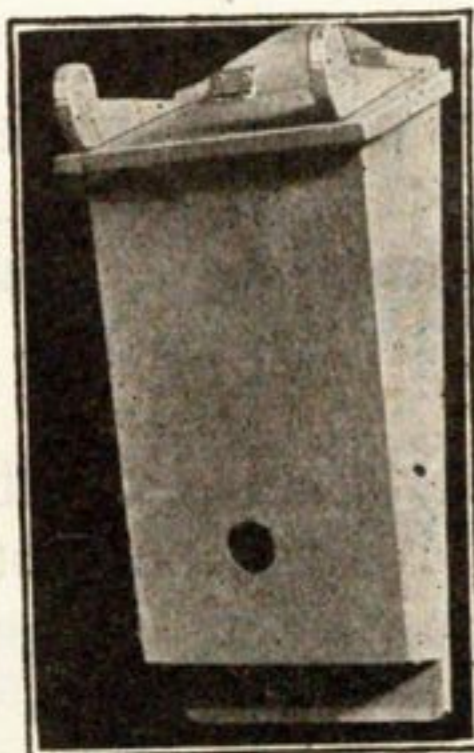

Place one or more of our wren houses in your yard and make a home for the most desirable and beneficial of all American birds.

We will also build to your order any arbor or garden entrance you may have in mind. Material furnished for lattice and picket fences, red brick for garden walks, etc.

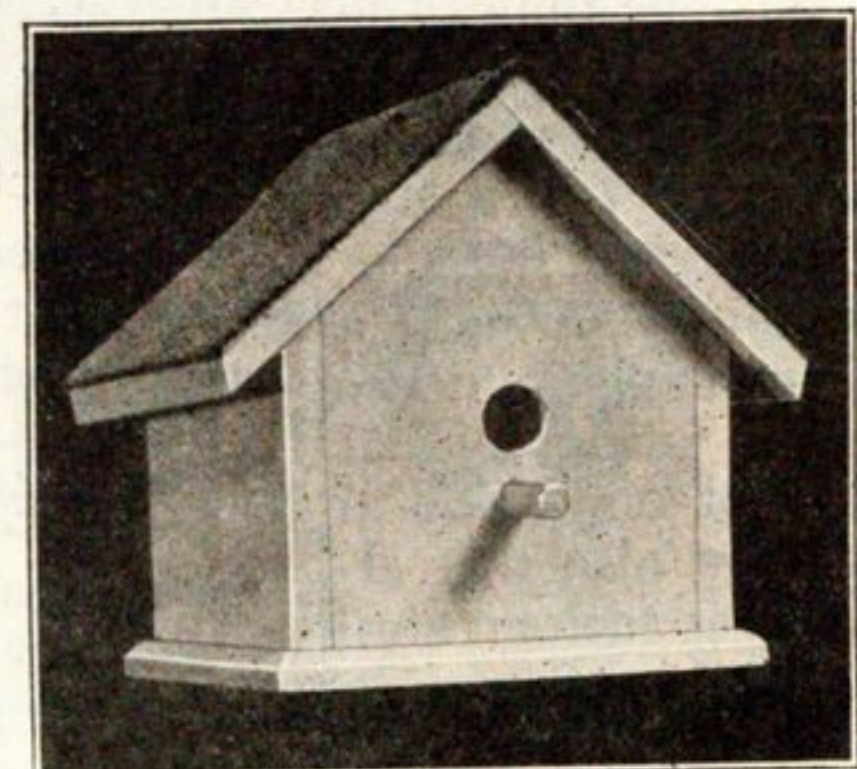

Ask us to send you our interesting circular, "Making Your Home More Attractive."
