It's Important

A few things that are necessary to properly handle a Rug Cleaning establishment are (1) Experience, (2) Proper Equipment, (3) Proper Cleaning Materials, (4) Plenty of Out-of-Doors Drying Space, so that rugs are exposed to the air and sun. This is especially important for cleaning and drying Oriental rugs.

Many rug cleaning plants are deprived of the open air space so necessary in the drying of expensive rugs.

Our rug cleaning plant is equipped with these facilities. All rugs sent to us are (1) thoroughly dusted, (2) thoroughly washed, (3) thoroughly dried in the sun and open air and (4) they are thoroughly repaired and straightened and when you get them back, they are about the same as new.
