

HEALTH DOLLAR DOES FINE JOB

State Health Authority Gives Figures

Acting on the theory that the legislature as well as the taxpayer will manifest interest in what has become of the appropriations made to the health department by the 53rd general assembly, Dr. Isaac D. Rawlins, state health director, has prepared a brief report covering the first 17 months of the current biennium.

Item number one in the report states that representatives of the state health department paid 13,465 official visits to local communities in the various counties in the state during the 17 months ended November 1, 1924. This gives an average of about 130 visits per county or a total of nearly 800 trips per month, an average of about 30 daily. It is contended that such a volume of activity is bound to have produced considerable results of a satisfactory character.

Cook County Leads

Cook county headed the list for official attention of the health officers, drawing 1,039 of the 13,465 visits while Peoria county, with 962, stood high for the down state territory. Putnam county drew last place with but four visits, being slightly below Calhoun and Boone with six and seven respectively.

Enlarging upon the cause for so many journeys into the state the report points out that 6,499 trips resulted from the demands of local health workers for expert advice and assistance; 4402 were for making special investigations concerning outbreaks of diseases—tracing and eliminating the source, establishing quarantine and other control measures; 774 were for delivering public health lectures; 329 were for inspecting and supervising the production of public water supplies. Other trips were made for miscellaneous purposes.

Many Examined

By way of describing certain features of the activities the report indicates that 112,460 adults were examined physically for demonstrational purposes; 33,049 babies and 24,113 school children were examined by physicians, 9,548 personal conferences were held in regard to local health service and 33 municipalities were assisted in passing safe milk ordinances.

The largest item on the report was the statement that nearly 300,000,000 units of diphtheria antitoxin were distributed gratuitously but it must be remembered that several thousand units are required for one patient. The distribution of educational literature and motion pictures stood second totaling nearly a million pieces. There were 87,477 cases of venereal diseases treated in the clinics supervised by the department while 52,956 doses of biologics, other than diphtheris antitoxin were distributed free. Clinics for treating crippled children were held to the number of 72 before that service was taken over by the Illinois Crippled Children's Society. Another important item shown on the report was the 95,246 examinations made in the diagnostic laboratory.

Doing Excellent Work

"The compilation shows in gratifying measure that the public health dollar is doing heavy duty," declared Dr. Rawlins, "but the services rendered have merely scratched the surface compared to the public health needs in the state. Extension of local health service is particularly indicated and legislation will be recommended which will provide for local health service under the direction of full time county health officers.

Julia Hurley has been added to the cast of Richard Dix's forthcoming Paramount picture, "Too Many Kisses." Mrs. Hurley was seen last in support of Bebe Daniels in "Argentine Love."

EXPERTS IN RADIO TO TALK AT HIGH SCHOOL

Karl "Low Loss" Hassel, radio expert who derives his nickname from his experiments with what are termed low loss sets, speaks before the New Trier Radion club Friday afternoon of this week in the chemistry lecture room of the school. He was to explain the principles of his work to a large audience composed not only of club members but of other radio fans.

The Radion club is a comparatively new organization at New Trier. It was established about two months ago by a number of students who are radio fans and has since grown to be quite a large group. The club numbers 15 active and about 100 associate members at present.

Plans are on foot to install a receiving set and a transmitting set to be operated under an experimental license at the school. Interesting speakers are being secured to speak every week before the club and any one else who cares to attend. Thursday evening, January 29, McMurdo Silver, another radio authority, will speak in the school auditorium at 7:45 o'clock, on the general principles of the super-heterodyne set. The public is invited.

Club members hope to do great things in the future. They point out that most of the wonderful advances in the science of radio receiving and broadcasting have been due to the work of amateurs. The most that any of the electrical wizards of the country have done along this line was to take the innovations introduced by amateurs and design them for general production and use.

The officers of the Radion club are Brad Hutson, president; Clark Shabino, vice-president; R. L. Shoemaker, secretary and W. J. O'Connell, treasurer.

HARD TO REPAIR

The chief stock in trade of most of us is the body that we carry around. What makes it different from a stock of merchandise is that new parts are not for sale and it is mighty hard to repair the old ones when damaged.

Mrs. A. D. Hannah of 417 Abbottsford road entertained a small group of her intimate friends at luncheon at her home Wednesday.

THE lonesome little boy who is feeling sad because "all the other fellows have a radio set" has the sympathy of Mr. Electro-serve. He knows that the little fellow will cheer up when he gets his—and that ought to be—right away.

Invite to Fourth Organ Recital at St. Luke's

The fourth North Shore Organ recital is announced for Tuesday, January 20, 8 o'clock, on the great organ of St. Luke's church, Evanston. The program will be given by Stanley Martin of Northwestern university School of Music, sub-dean of the Illinois Chapter American Guild of Organists and Organist of the Chicago Sunday Evening club. He will be assisted by two former members of the Chicago Civic orchestra: Miss Goldie Gross, cellist; and Miss Dorothy Bell, harpist.

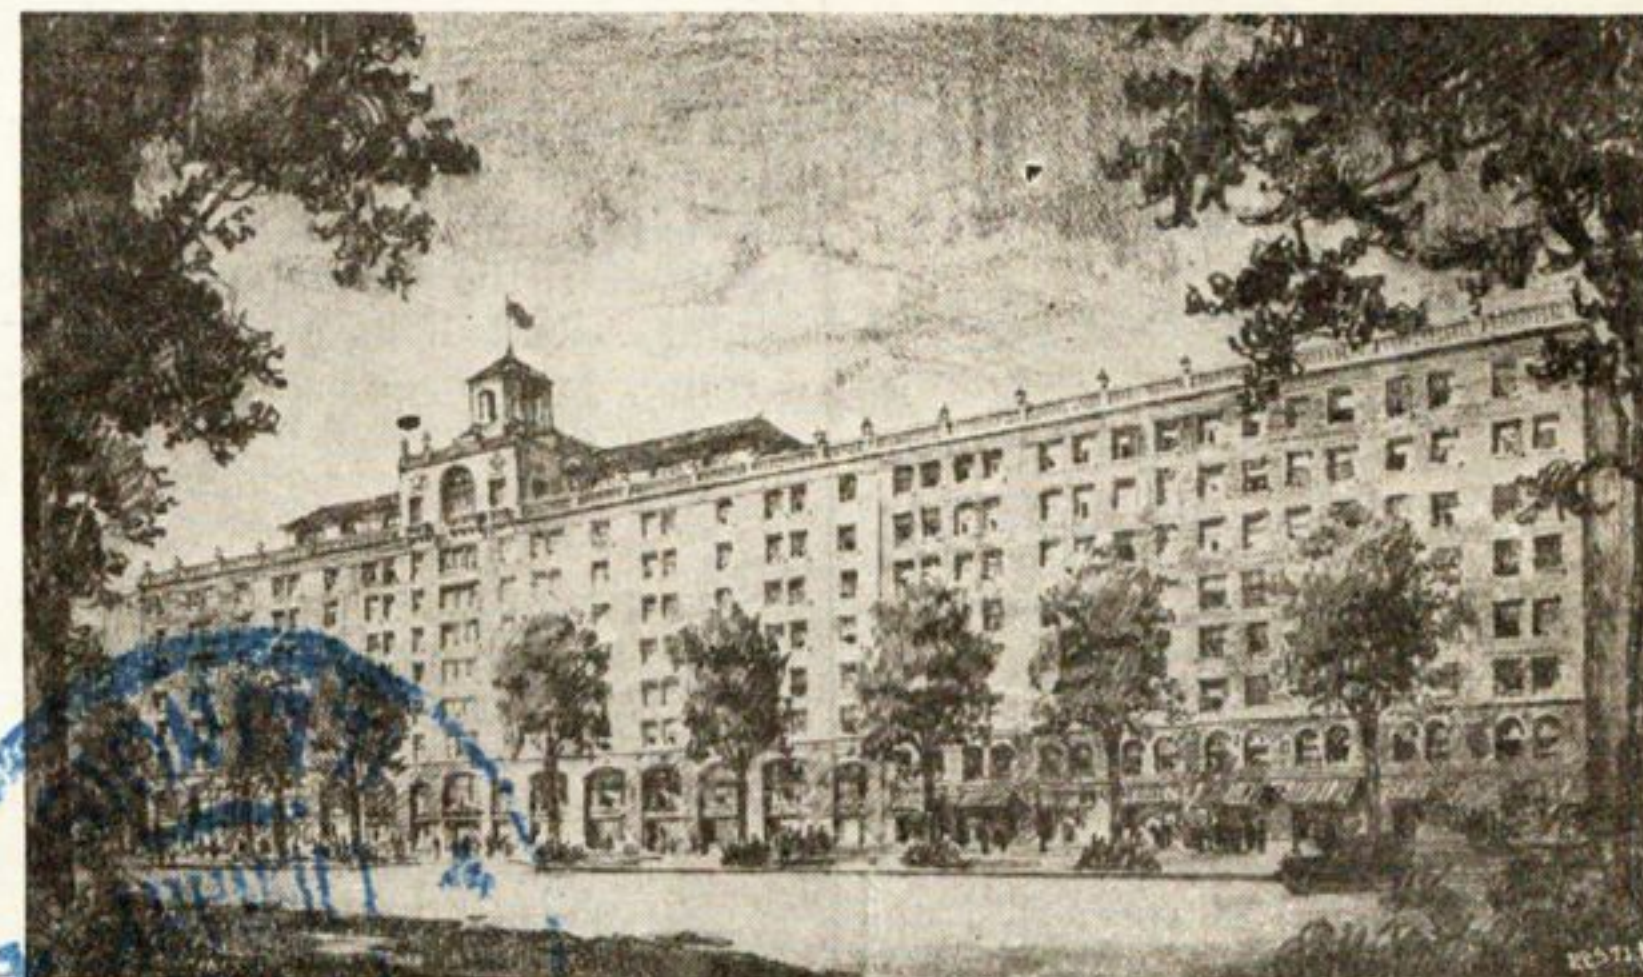

Nearly all the organ numbers are by American composers, one, "Slumber Song," is by Lester Groom, a Chicago composer. The list includes: Concert Overture in A (Maitland); Benedictus (Reger); Sonata B Flat (Roger); Pygmies (Stoughton); Six Pictures (Lemare); and Toccata in D (Kinder). The harp and cello numbers are the familiar and beautiful Berceuse from

Jocelyn (Godard); The Swan (Saint-Saen); Largo (Handel); and Ave Maria (Bach-Gounod).

Admission to these community concerts is free.

Mrs. John V. Rathbone entertained the bridge club at luncheon on Tuesday.

The Church of the Holy Comforter opened its doors for one of its famous Parish Dinners Wednesday evening. The menu was a most delicious one and boasted turkey for its piece de resistance. Mrs. B. C. Hawkes was in charge of the affair and much of its success was due to her skillful management.

Home Builders!

WHILE awaiting the completion of your new home, remodeling or redecorating, remember that at The Orrington you will find comfortable temporary quarters, convenient to transportation and within "eye-watch" of builders, repairers or decorators.

New

CHEVROLET

Now on Display

New

value—new quality—a new line of Chevrolet models even better than ever before Chevrolet has become the world's largest producer of automobiles with modern, 3-speed transmission by making quality cars to sell at low cost. Now this Chevrolet quality has been greatly increased

New

chassis—with larger, stronger frame; new semi-elliptic, chrome vanadium steel springs; stronger axles, rear axle of the finest construction—banjo type housing with greatly strengthened gears; improved, fully enclosed dry-plate disc clutch requiring no lubrication; extra heavy brake bands; and many improvements on the powerful Chevrolet motor.

New

bodies—of even greater beauty and comfort. All models have new radiator of more beautiful design, made of non-rusting airplane metal. All closed models have new and exceptionally beautiful Fisher bodies with the new VV closed-body one-piece windshield and automatic windshield wiper. Balloon tires on all closed models and disc wheels on the Sedan and Coupe.

New

finish—all models are now finished in Duco—the new finish that retains its color and lustre almost indefinitely and withstands the severest usage. These are but a few of the quality features of the new Chevrolet—quality features that you would expect to find only on cars of much higher price.
